

Contents

1	Introduction	1
	Multiferroics and Magnetoelectric Effect	1
	Linear Magnetoelectric Effects	1
	Phase Control in Multiferroics	3
	Magnetically-Induced Ferroelectricity and Giant ME Response	3
	Magnetic Frustration	4
	1D-Chain with Competing Nearest and Next-Nearest Neighbor Interactions	5
	Geometrical Frustration	6
	Role of Magnetic Anisotropy	6
	Magnetically-Induced Ferroelectricity	7
	Magnetic Symmetry	7
	Microscopic Origin of Magnetoelectric Coupling	8
	Purpose	10
	References	12
2	Experimental Methods	15
	Crystal Growth	15
	CuFeO ₂ , CuFe _{1-x} Al _x O ₂ and CuFe _{1-x} Ga _x O ₂	15
	ACrO ₂ (A = Cu, Ag, Li and Na)	16
	LiCu ₂ O ₂ and NaCu ₂ O ₂	16
	CuCl ₂ , VCl ₂ , MnI ₂ and CoI ₂	16
	Magnetic Property Measurement	17
	Dielectric Property Measurement	17
	Dielectric Constant	17
	Electric Polarization	18
	Heat Capacity Measurement	18
	Electron Spin Resonance	19
	Polarized Neutron Scattering	20

THz Time-Domain Spectroscopy	21
References	23
3 Magnetolectric Response in Triangular Lattice	
Antiferromagnets	25
Introduction	25
AMO_2 and MX_2	25
Ferroelectricity Induced by Proper Screw Magnetic	
Order in CuFeO_2	27
Overview	29
CuFeO_2	29
Impurity-Doping-Induced Ferroelectricity	29
Magnetic Digital Flop of Ferroelectric Domain	39
Electromagnon in the Paraelectric Collinear Spin State	48
ACrO_2 : Ferroelectricity Induced by 120° -Spin Order	54
Introduction	54
Results on Polycrystal	56
Results on Single Crystal	60
Discussion	64
Conclusion	65
MX_2 -Type Halides With CdI_2 Structure	66
MnI_2 With Proper Screw Spin Order	67
CoI_2 With Cycloidal Spin Order	76
VCl_2 With 120° -Spin Order	76
Summary	78
CuFeO_2 With Proper Screw Spin Order ($q \parallel [110]$)	78
References	80
4 Magnetolectric Response in $S = 1/2$ Chain Helimagnets	85
Introduction	85
Magnetism in Edge-Shared CuO_2 Chain	85
Magnetolectric Response in LiCu_2O_2	87
Magnetolectric Response in LiCuVO_4	88
Origin of Magnetically-Induced Ferroelectricity	
in $S = 1/2$ Chain Helimagnets	89
Overview	90
LiCu_2O_2 : Correlation Between Spin-Helicity and Electric	
Polarization Vector	90
Introduction	90
Results	91
Discussion	95
Conclusion	96
CuCl_2	97
Introduction	97

Results	97
Conclusion	102
Summary	102
LiCu_2O_2	102
CuCl_2	102
References	103
5 Summary	105
Conclusion	105
Magnetoelectric Response in Triangular Lattice	
Antiferromagnets	105
Magnetoelectric Response in $S = 1/2$ Chain Helimagnets	107
Perspective for the Future	108
Topological Defects in Magnetically-Induced Ferroelectrics	108
Role of Anion for the Magnetically-Induced Ferroelectricity	108
References	109
Publication List	111

Magnetoelectric Response in Low-Dimensional
Frustrated Spin Systems

Seki, S.

2012, XII, 112 p., Hardcover

ISBN: 978-4-431-54090-8
