

Contents

- 1 Multiple Decrement Models 1**
 - 1.1 Introduction 1
 - 1.2 Time to Decrement and Cause of Decrement Random Variables . . 3
 - 1.3 Multiple Decrement Table 22
 - 1.4 Associated Single Decrement Model 29
 - 1.5 Exercises 48
- 2 Premiums and Reserves in Multiple Decrement Model 53**
 - 2.1 Introduction 53
 - 2.2 Actuarial Present Value of Benefit 54
 - 2.3 Computation of Premiums 58
 - 2.4 Computation of Reserves 75
 - 2.5 Exercises 79
- 3 Defined Benefit Pension Plan 81**
 - 3.1 Introduction 81
 - 3.2 Actuarial Present Value of Pension Benefit 84
 - 3.3 Exercises 128
- 4 Pension Funding 131**
 - 4.1 Introduction 131
 - 4.2 Accrued Benefit Cost Method for an Individual 132
 - 4.3 Accrued Benefit Cost Method for a Group 143
 - 4.4 Aggregate Actuarial Cost Method 163
 - 4.5 Exercises 171
- 5 Multi-state Transition Models for Cash Flows 173**
 - 5.1 Introduction 173
 - 5.2 Markov Chain 174
 - 5.3 Actuarial Present Values of Cash Flows 179
 - 5.4 Markov Process Model 189
 - 5.5 Exercises 201

6	Stochastic Interest Rate	205
6.1	Introduction	205
6.2	Random Interest Scenario	205
6.3	Parametric Models	209
6.4	Time Series Models	212
6.5	Exercises	215
