
Contents

1	Local theory of curves	1
1.1	How to define a curve	1
1.2	Arc length	9
1.3	Curvature and torsion	14
	Guided problems	26
	Exercises	35
	<i>Supplementary material</i>	
1.4	<i>The local canonical form</i>	47
1.5	<i>Whitney's Theorem</i>	53
1.6	<i>Classification of 1-submanifolds</i>	55
1.7	<i>Frenet-Serret formulas in higher dimensions</i>	61
2	Global theory of plane curves	67
2.1	The degree of curves in S^1	67
2.2	Tubular neighborhoods	75
2.3	The Jordan curve theorem	79
2.4	The turning tangents theorem	85
	Guided problems	91
	Exercises	94
	<i>Supplementary material</i>	
2.5	<i>Convex curves</i>	96
2.6	<i>The four-vertex theorem</i>	99
2.7	<i>Isoperimetric inequality</i>	103
2.8	<i>Schönflies' theorem</i>	106
3	Local theory of surfaces	117
3.1	How to define a surface	117
3.2	Smooth functions	132
3.3	Tangent plane	135
3.4	Tangent vectors and derivations	138

Guided problems	147
Exercises	152
<i>Supplementary material</i>	
3.5 Sard's theorem	159
3.6 Partitions of unity	161
4 Curvatures	165
4.1 The first fundamental form	166
4.2 Area	173
4.3 Orientability	178
4.4 Normal curvature and second fundamental form	183
4.5 Principal, Gaussian and mean curvatures	191
4.6 Gauss' Theorema egregium	199
Guided problems	205
Exercises	218
<i>Supplementary material</i>	
4.7 Transversality	230
4.8 Tubular neighborhoods	237
4.9 The fundamental theorem of the local theory of surfaces	242
5 Geodesics	247
5.1 Geodesics and geodesic curvature	248
5.2 Minimizing properties of geodesics	261
5.3 Vector fields	268
Guided problems	278
Exercises	282
<i>Supplementary material</i>	
5.4 The Hopf-Rinow theorem	288
5.5 Locally isometric surfaces	296
6 The Gauss-Bonnet theorem	303
6.1 The local Gauss-Bonnet theorem	304
6.2 Triangulations	308
6.3 The global Gauss-Bonnet theorem	315
6.4 The Poincaré-Hopf theorem	325
Guided problems	331
Exercises	333
<i>Supplementary material</i>	
6.5 Existence of triangulations	338
7 Global theory of surfaces	345
7.1 Surfaces with constant positive curvature	346
7.2 Surfaces with constant zero curvature	349
7.3 Surfaces with constant negative curvature	355
Guided problems	361

Exercises	363
<i>Supplementary material</i>	
7.4 <i>Positive Gaussian curvature</i>	364
7.5 <i>Covering maps</i>	371
7.6 <i>Non-positive Gaussian curvature</i>	377
References	381
List of symbols	383
Index	385
