## Part I Biotech Patents

---

### Introduction

*Paolo Veronesi* ..... 3

### The Case against the Privatization of Knowledge: Some Thoughts on the Myriad Genetics Controversy

*Giorgio Resta* ..... 11

### Patentability Requirements of Biotech Inventions at the European Patent Office: Ethical Issues

*Giovanni Macchia* ..... 37

### The Right to Access the Benefits of Science and Intellectual Property Rights

*Aurora Plomer* ..... 45

### “Ownership and Provenance” of Genetic Material in the Rules on Biotechnological Patents

*Rosaria Romano* ..... 69

### Biotechnology Patents Norms: Emerging Difficulties

*Cecilia Zorzoli* ..... 77

### From the Patentability of Living Matter to the Ethics of Biotechnological Innovation: the Person-Body Relationship

*Silvia Zullo* ..... 87

### Issues and Rights in DNA-based Inventions

*Nicola Lucchi* ..... 97

---

## Part II Freedom of Scientific Research in Genetics

---

### Bioethics and Freedom of Scientific Research in Gene Therapy and Stem Cell Biology

*Roberto Gambari and Alessia Finotti* ..... 115

<b>Freedom of Scientific Research in the Field of Genetics</b>	
<i>Roberto Bin</i> .....	131
<b>Genetic Testing and Authentication of Paternity after Death of the Putative Father: the Bio-history and Its “Costs”</b>	
<i>Giacomo D’Amico</i> .....	145
<b>The Legal Implications of Preimplantation Genetic Diagnosis</b>	
<i>Ilja Richard Pavone</i> .....	155
<b>Preimplantation Diagnosis of the Embryo: Legislative Inflexibility <i>in vitro</i> and Attempts at Greater Flexibility <i>in vivo</i></b>	
<i>Stefano Agosta</i> .....	171
<b>Some Ethical and Regulatory Aspects Involved in Direct-to-Consumer Genetic Testing (DCGT)</b>	
<i>Maria Jorqui Azofra</i> .....	181
<b>Adjusting the Individualistic Framework of Protection in Human Genetic Research</b>	
<i>Marta Tomasi</i> .....	197
<b>Xenotransplantation and Human Rights</b>	
<i>Paola Sobbrío</i> .....	207
<b>Pharmacogenetics and Fundamental Rights</b>	
<i>Elena Falletti</i> .....	217
<b>Genetic Research and European Integration</b>	
<i>Sara Lorenzon</i> .....	227
<hr/> <b>Part III Genetic Research and Protection of Individual Rights</b> <hr/>	
<b>Genetic Data in Forensic Science: Use, Misuse and Abuse</b>	
<i>Guido Barbujani and Francesca Tassi</i> .....	243
<b>Genetic Research and Rights of the People Involved: from an Individual Approach to an Universal Perspective</b>	
<i>Elisa Stefanini</i> .....	261
<b>Towards a Genetic Registry Office?</b>	
<i>Ilaria Anna Colussi</i> .....	275
<b>Genetic Data Retention and the Italian Discipline of Acquittal: Database Improvement and the Fundamental Rights of the Individual</b>	
<i>Francesco Morelli</i> .....	287

<b>Use of Genetic Data for Research Purposes and Consent: Love or Hate? A Proposal of Balance Taking Account of the “Specific Weight” of the Single Research</b>	
<i>Giulia Vaccari</i> .....	299
<b>The <i>habeas data</i> in the Genetic Research: Intrinsic Limits and Threats from Outside</b>	
<i>Monica Alessia Senor</i> .....	311
<b>First Observations on the Right to Development Approach to Informed Consent in Medical and Genetic Research</b>	
<i>Lucia Busatta</i> .....	323
<b>Genetic Research and Protection of Individual Rights: a First Approach to the French Model</b>	
<i>Elisabetta Pulice</i> .....	335
<b>Access to Genetic Resources in the Practices of States</b>	
<i>Andrea Crescenzi</i> .....	345

Biotech Innovations and Fundamental Rights

Bin, R.; Lorenzon, S.; Lucchi, N. (Eds.)

2012, X, 354 p., Hardcover

ISBN: 978-88-470-2031-3
