<b>On the estimation in continuous limit of GARCH processes</b> <i>Giuseppina Albano, Francesco Giordano, and Cira Perna</i>	1
<b>Variable selection in forecasting models for default risk</b> <i>Alessandra Amendola, Marialuisa Restaino, and Luca Sensini</i>	11
<b>Capital structure with firm’s net cash payouts</b> <i>Flavia Barsotti, Maria Elvira Mancino, and Monique Pontier</i>	19
<b>Convex ordering of Esscher and minimal entropy martingale measures for discrete time models</b> <i>Fabio Bellini and Carlo Sgarra</i>	27
<b>On hyperbolic iterated distortions for the adjustment of survival functions</b> <i>Alexis Bienvenue and Didier Rullière</i>	35
<b>Beyond Basel2: Modeling loss given default through survival analysis</b> <i>Stefano Bonini and Giuliana Caivano</i>	43
<b>Initial premium, aggregate claims and distortion risk measures in <i>XL</i> reinsurance with reinstatements</b> <i>Antonella Campana and Paola Ferretti</i>	53
<b>Population dynamics in a spatial Solow model with a convex-concave production function</b> <i>Vincenzo Capasso, Ralf Engbers, and Davide La Torre</i>	61
<b>Population dynamics in a patch growth model with S-shaped production functions and migration effects</b> <i>Vincenzo Capasso, Herb E. Kunze, and Davide La Torre</i>	69
<b>An ordinal approach to risk measurement</b> <i>Marta Cardin and Miguel Couceiro</i>	79

<b>Piecewise linear dynamic systems for own risk solvency assessment</b> <i>Rocco Roberto Cerchiara and Fabio Lamantia</i> . . . . .	87
<b>Valuation of the conditional indexation option in asset and liability management of defined benefit pension funds</b> <i>Rosa Cocozza, Angela Gallo, and Giuseppe Xella</i> . . . . .	95
<b>Conditional performance attribution for equity portfolio</b> <i>Claudio Conversano and Alessio Lizzeri</i> . . . . .	105
<b>Capital requirements for aggregate risks in long term living products: A stochastic approach</b> <i>Mariarosaria Coppola, Albina Orlando, and Massimiliano Politano</i> . . . . .	115
<b>Portfolio selection with an alternative measure of risk: Computational performances of particle swarm optimization and genetic algorithms</b> <i>Marco Corazza, Giovanni Fasano, and Riccardo Gusso</i> . . . . .	123
<b>Interdependence and contagion in international stock markets: A latent Markov model approach</b> <i>Michele Costa, Luca De Angelis, and Leonard J. Paas</i> . . . . .	131
<b>Valuation of portfolio loss derivatives in an infectious model</b> <i>Areski Cousin, Diana Dorobantu, and Didier Rullière</i> . . . . .	139
<b>Internal risk control by solvency measures</b> <i>Valeria D'Amato, Emilia Di Lorenzo, Maria Russolillo, and Marilena Sibillo</i> . . . . .	149
<b>Measuring mortality heterogeneity in pension annuities</b> <i>Valeria D'Amato, Gabriella Piscopo, and Maria Russolillo</i> . . . . .	157
<b>Is technical analysis able to beat market inefficiency?</b> <i>Elisa Daniotti</i> . . . . .	165
<b>On the damped geometric telegrapher's process</b> <i>Antonio Di Crescenzo, Barbara Martinucci, and Shelemyahu Zacks</i> . . . . .	175
<b>Risk measures and Pareto style tails</b> <i>Anna Maria Fiori, Emanuela Rosazza Gianin, and Anna Spasova</i> . . . . .	183
<b>Credit risk and incomplete information: A filtering framework for pricing and risk management</b> <i>Claudio Fontana</i> . . . . .	193
<b>Claims reserving uncertainty in the development of internal risk models</b> <i>Salvatore Forte, Matteo Ialenti, and Marco Pirra</i> . . . . .	203

<b>Some inequalities between measures of multivariate kurtosis, with application to financial returns</b> <i>Cinzia Franceschini and Nicola Loperfido</i> .....	211
<b>The generalized trapezoidal model in financial data analysis</b> <i>Manuel Franco, Johan René van Dorp, and Juana-María Vivo</i> .....	219
<b>Nonparametric estimation of volatility functions: Some experimental evidences</b> <i>Francesco Giordano, Michele La Rocca, and Cira Perna</i> .....	229
<b>Investigating and modelling the perception of economic security in the Survey of Household Income and Wealth</b> <i>Maria Iannario and Domenico Piccolo</i> .....	237
<b>On ruin probabilities in risk models with interest rate</b> <i>Nino Kordzakhia, Alexander Novikov, and Gurami Tsitsiashvili</i> .....	245
<b>On longevity risk securitization and solvency capital requirements in life annuities</b> <i>Susanna Levantesi, Massimiliano Menzietti, and Tiziana Torri</i> .....	255
<b>Modelling the share prices as a hidden random walk on the lamplighter group</b> <i>Xiaojuan Ma and Sergey Utev</i> .....	263
<b>Multivariate jump arrivals: The variance gamma case</b> <i>Roberto Marfè</i> .....	271
<b>Modelling the skewed exponential power distribution in finance</b> <i>J. Miguel Marín and Genaro Sucarrat</i> .....	279
<b>Composite indicators: A sectorial perspective</b> <i>Marco Marozzi</i> .....	287
<b>Dynamic model of pension savings management with stochastic interest rates and stock returns</b> <i>Igor Melicherčík and Daniel Ševčovič</i> .....	295
<b>Financial and demographic risks impact on a pay-as-you-go pension fund</b> <i>Roberta Melis and Alessandro Trudda</i> .....	305
<b>Extracting implied dividends from options prices: Some applications to the Italian derivatives market</b> <i>Martina Nardon and Paolo Pianca</i> .....	315
<b>Generalization of some linear time series property to nonlinear domain</b> <i>Marcella Niglio and Cosimo Damiano Vitale</i> .....	323
