
Contents

1	Introductory Notions	1
1.1	Definitions and First Theorems	1
	Exercises	22
1.2	Cosets and Lagrange's Theorem	24
	Exercises	33
1.3	Automorphisms	34
	Exercises	37
2	Normal Subgroups, Conjugation and Isomorphism	
	Theorems	39
2.1	Product of Subgroups	39
2.2	Normal Subgroups and Quotient Groups	40
	Exercises	49
2.3	Conjugation	50
2.3.1	Conjugation in the Symmetric Group	55
	Exercises	58
2.4	Normalizers and Centralizers of Subgroups	59
	Exercises	62
2.5	Hölder's Program	63
2.6	Direct Products	67
	Exercises	72
2.7	Semidirect Products	73
2.8	Symmetric and Alternating Groups	78
	Exercises	81
2.9	The Derived Group	82
	Exercises	85
3	Group Actions and Permutation Groups	87
3.1	Group actions	87
	Exercises	97

3.2	The Sylow Theorem	99
	Exercises	113
3.3	Burnside's Formula and Permutation Characters	117
	Exercises	122
3.4	Induced Actions	125
	Exercises	127
3.5	Permutations Commuting with an Action	128
	Exercises	132
3.6	Automorphisms of Symmetric Groups	134
	Exercise	135
3.7	Permutations and Inversions	136
	Exercises	139
3.8	Some Simple Groups	143
	3.8.1 The Simple Group of Order 168	143
	3.8.2 Projective Special Linear Groups	147
	Exercises	152
4	Generators and Relations	155
4.1	Generating Sets	155
	Exercises	158
4.2	The Frattini Subgroup	160
	Exercises	163
4.3	Finitely Generated Abelian Groups	164
4.4	Free abelian groups	170
4.5	Projective and Injective Abelian Groups	178
4.6	Characters of Abelian Groups	181
	Exercises	182
4.7	Free Groups	183
	Exercises	187
4.8	Relations	188
	Exercises	192
	4.8.1 Relations and simple Groups	192
4.9	Subgroups of Free Groups	194
	Exercises	198
4.10	The Word Problem	198
4.11	Residual Properties	200
	Exercises	203
5	Nilpotent Groups and Solvable Groups	205
5.1	Central Series and Nilpotent Groups	205
	Exercises	221
5.2	p -Nilpotent Groups	223
	Exercises	228
5.3	Fusion	229
	Exercises	231

5.4	Fixed-Point-Free Automorphisms and Frobenius Groups	232
	Exercises	237
5.5	Solvable Groups	237
	Exercises	249
6	Representations	253
6.1	Definitions and examples	253
	6.1.1 Maschke's Theorem	257
6.2	Characters	259
6.3	The Character Table	275
	6.3.1 Burnside's Theorem and Frobenius Theorem	280
	Exercises	284
	6.3.2 Topological Groups	285
7	Extensions and Cohomology	289
7.1	Crossed Homomorphisms	289
7.2	The First Cohomology Group	292
	Exercises	295
	7.2.1 The Group Ring $\mathbb{Z}\pi$	297
	Exercises	301
7.3	The Second Cohomology Group	301
	7.3.1 H^1 and Extensions	307
	7.3.2 $H^2(\pi, A)$ for π Finite Cyclic	308
	Exercises	310
7.4	The Schur Multiplier	312
	7.4.1 Projective Representations	313
	7.4.2 Covering Groups	315
	7.4.3 $M(\pi)$ and Presentations of π	320
8	Solution to the exercises	327
8.1	Chapter 1	327
8.2	Chapter 2	329
8.3	Chapter 3	335
8.4	Chapter 4	346
8.5	Chapter 5	351
8.6	Chapter 6	358
8.7	Chapter 7	360
	References	363
	Index	365

Groups

An Introduction to Ideas and Methods of the Theory of
Groups

Machi, A.

2012, XIII, 371 p., Softcover

ISBN: 978-88-470-2420-5
