

# Contents

- 1 Let’s Make the Universe: Light and Matter . . . . . 1**
  - The First Instants . . . . . 2
  - Matter and Antimatter . . . . . 3
  - Fusion and Nucleosynthesis . . . . . 5
  - The First Atoms and the Pictures of the  
New-Born Universe . . . . . 6
  - Fossil Radiation . . . . . 7
  - The First Stars . . . . . 10
  - Supernovae: All the Elements Are Born . . . . . 11
    - First . . . . . 12
    - Second . . . . . 12
    - Third . . . . . 13
  - Galaxies . . . . . 14
- 2 Let’s Make the Rest of the Universe . . . . . 15**
  - What’s in the Sky Between Star and Star? . . . . . 15
  - Interstellar Molecules . . . . . 17
  - Life Bricks and Stardust . . . . . 19
  - From Clouds to Nests of Stars . . . . . 20
  - Fasting Stars . . . . . 23
  - Let’s Make Planetary Systems . . . . . 24
  - Let’s Make Our Solar System . . . . . 27
  - Let’s Make the Earth . . . . . 29
- 3 Astronomy in Search of Alien Planets . . . . . 33**
  - The First Extrasolar Planet . . . . . 34
  - The Transits Method . . . . . 37

	The Method of Gravitational Lenses . . . . .	39
	Other Methods Employed in ‘Seeing’ Extrasolar Planets . .	40
	What Can We Learn from the Planets	
	We Already Found? . . . . .	41
	What Planets We Would Like to Find . . . . .	44
<b>4</b>	<b>Contact Astronomy: The Universe Invades Us . . . . .</b>	<b>47</b>
	A New Science, as Old as the Hills . . . . .	48
	The Murchison Meteorite . . . . .	49
	Natural Exchanges Among Planets:	
	It Is No Science Fiction . . . . .	51
	A Very Special (Martian) Rock . . . . .	55
<b>5</b>	<b>Contact Astronomy: Ourselves, the Invaders . . . . .</b>	<b>59</b>
	First Steps Outside Earth . . . . .	59
	Going to Venus and Mars . . . . .	62
	Our Print on Other Planets . . . . .	64
	More Close Encounters . . . . .	65
	Is There Life on Mars? . . . . .	68
<b>6</b>	<b>Contact Astronomy: Comet Dust . . . . .</b>	<b>75</b>
	From Giotto Comet to the Bombarded Comet . . . . .	76
	A Bit of Hair Caught and Brought Back to Earth . . . . .	78
	Sun Dust on Earth . . . . .	80
<b>7</b>	<b>From Bricks to House: What Is Life? . . . . .</b>	<b>83</b>
	Introduction . . . . .	83
	What Is Life? . . . . .	85
	Life: A Probable Phenomenon or a Coincidence? . . . . .	88
	Life: Constructive Approaches and Deductive	
	Approaches . . . . .	89
	Life 2.0? . . . . .	90
	Panspermia . . . . .	92
<b>8</b>	<b>Is There Anybody Out There? . . . . .</b>	<b>97</b>
	The Saga of the Martians . . . . .	98
	Ozma and Drake’s Equation . . . . .	103
	SETI: Galactic Eavesdropping @ Home . . . . .	105
	The ‘Berlusconi Bubble’ . . . . .	107
	A Message in a Bottle . . . . .	108

**9 CODA: What Remains to Be Discovered? . . . . . 111**

**10 15 Stories To Get Rid Of . . . . . 117**

**11 You Might Not Know That . . . . . 121**

**References . . . . . 127**

We are the Martians

Connecting Cosmology with Biology

Bignami, G.F.

2012, XXIII, 128 p. 22 illus., Softcover
