

Contents

1	Preliminaries	1
1.1	Gaussian Random Vectors	1
1.2	Hermite Polynomials	3
1.3	Gaussian Processes	5
1.4	Continuity	8
1.5	Existence of the Fractional Brownian Motion	8
2	Fractional Brownian Motion	11
2.1	Definition	11
2.2	Basic Properties	12
2.3	Three Stochastic Representations	13
2.4	Semimartingale Property	17
2.5	Markov Property	20
2.6	Hurst Phenomenon	21
3	Integration with Respect to Fractional Brownian Motion	23
3.1	Young Integral	23
3.2	Solving Integral Equations	26
3.2.1	Multidimensional Case	26
3.2.2	One-Dimensional Case	28
3.3	Dimension One and Hurst Index Less than 1/2	30
4	Supremum of the Fractional Brownian Motion	39
4.1	Asymptotic Behavior at Infinity	40
4.2	Asymptotic Behavior at Zero	45
5	Malliavin Calculus in a Nutshell	53
5.1	Itô Stochastic Calculus	53
5.2	Multiple Wiener–Itô Integrals and Wiener Chaoses	55
5.3	Malliavin Derivatives	59
5.4	Generator of the Ornstein–Uhlenbeck Semigroup	61
6	Central Limit Theorem on the Wiener Space	65
6.1	Stein’s Lemma for Gaussian Approximations	65

6.2	Combining Stein's Method with Malliavin Calculus	67
6.3	Wiener Chaos and the Fourth Moment Theorem	67
6.4	Quadratic Variation of the Fractional Brownian Motion	71
6.5	Multivariate Gaussian Approximation	75
7	Weak Convergence of Partial Sums of Stationary Sequences	83
7.1	General Framework	83
7.2	Central Limit Theorem	85
7.3	Non-Central Limit Theorem	89
7.3.1	Computation of Cumulants	90
7.3.2	Proof of Theorem 7.3	94
8	Non-Commutative Fractional Brownian Motion	103
8.1	Free Probability in a Nutshell	103
8.1.1	Non-Commutative Probability Space	103
8.1.2	Random variables	104
8.1.3	Convergence in law	104
8.1.4	Free Independence	105
8.1.5	Semicircular Distribution	105
8.1.6	Free Brownian Motion	106
8.1.7	Wigner Integral	106
8.1.8	Semicircular Sequence and Semicircular Process	107
8.1.9	Multiple Wigner Integral	108
8.1.10	Wiener–Wigner Transfer Principle	109
8.2	Non-Commutative Fractional Brownian Motion	113
8.3	Central and Non-Central Limit Theorems	114
8.3.1	General Framework	114
8.3.2	Proof of the Central Limit Theorem (8.27)	115
8.3.3	Proof of the Non-Central Limit Theorem (8.29)	116

Selected Aspects of Fractional Brownian Motion

Nourdin, I.

2012, X, 122 p., Hardcover

ISBN: 978-88-470-2822-7
