

Contents

1	Basic Matlab	1
1.1	Matlab—The History and the Product	1
1.2	Creating Variables and Using Basic Arithmetic	2
1.3	Standard Functions	2
1.4	Vectors and Matrices	3
1.5	M-Files	5
1.6	The <i>colon</i> Notation and the <i>for</i> Loop	6
1.7	The <i>if</i> Construct	7
1.8	The <i>while</i> Loop	8
1.9	Simple Screen Output	9
1.10	Keyboard Input	9
1.11	User Defined Functions	10
1.12	Basic Statistics	11
1.13	Plotting	11
1.14	Formatted Screen Output	12
1.15	File Input and Output	14
	1.15.1 Formatted Output to a File	14
	1.15.2 Formatted Input from a File	14
	1.15.3 Unformatted Input and Output (Saving and Retrieving Data)	15
2	Linear Equations	17
2.1	Introduction	18
2.2	Linear Systems	19
2.3	Gaussian Elimination	22
	2.3.1 Row Interchanges	24
	2.3.2 Partial Pivoting	26
	2.3.3 Multiple Right-Hand Sides	30
2.4	Singular Systems	32
2.5	Symmetric Positive Definite Systems	33
2.6	Iterative Refinement	35
2.7	Ill-Conditioned Systems	37
2.8	Gauss–Seidel Iteration	37

3	Nonlinear Equations	47
3.1	Introduction	48
3.2	Bisection Method	49
3.2.1	Finding an Interval Containing a Root	50
3.3	Rule of False Position	51
3.4	The Secant Method	52
3.5	Newton–Raphson Method	55
3.6	Comparison of Methods for a Single Equation	58
3.7	Newton’s Method for Systems of Nonlinear Equations	59
3.7.1	Higher Order Systems	63
4	Curve Fitting	71
4.1	Introduction	71
4.2	Linear Interpolation	72
4.2.1	Differences	75
4.3	Polynomial Interpolation	77
4.3.1	Newton Interpolation	77
4.3.2	Neville Interpolation	80
4.3.3	A Comparison of Newton and Neville Interpolation	81
4.3.4	Spline Interpolation	83
4.4	Least Squares Approximation	86
4.4.1	Least Squares Straight Line Approximation	86
4.4.2	Least Squares Polynomial Approximation	89
5	Numerical Integration	97
5.1	Introduction	98
5.2	Integration of Tabulated Functions	98
5.2.1	The Trapezium Rule	99
5.2.2	Quadrature Rules	101
5.2.3	Simpson’s Rule	101
5.2.4	Integration from Irregularly-Spaced Data	102
5.3	Integration of Functions	104
5.3.1	Analytic vs. Numerical Integration	104
5.3.2	The Trapezium Rule (Again)	104
5.3.3	Simpson’s Rule (Again)	106
5.4	Higher Order Rules	109
5.5	Gaussian Quadrature	110
5.6	Adaptive Quadrature	112
6	Numerical Differentiation	119
6.1	Introduction	120
6.2	Two-Point Formula	120
6.3	Three- and Five-Point Formulae	122
6.4	Higher Order Derivatives	125
6.4.1	Error Analysis	126
6.5	Cauchy’s Theorem	128

7	Linear Programming	135
7.1	Introduction	136
7.2	Forming a Linear Programming Problem	136
7.3	Standard Form	140
7.4	Canonical Form	141
7.5	The Simplex Method	142
7.5.1	Starting the Simplex Method	146
7.6	Integer Programming	149
7.6.1	The Branch and Bound Method	151
7.7	Decision Problems	153
7.8	The Travelling Salesman Problem	155
7.9	The Machine Scheduling Problem	156
8	Optimisation	169
8.1	Introduction	170
8.2	Grid Searching Methods	171
8.2.1	Simple Grid Search	171
8.2.2	Golden Section Search	173
8.3	Unconstrained Optimisation	175
8.3.1	The Method of Steepest Descent	176
8.3.2	A Rank-One Method	178
8.3.3	Generalised Rank-One Method	181
8.4	Constrained Optimisation	184
8.4.1	Minimisation by Use of a Simple Penalty Function	185
8.4.2	Minimisation Using the Lagrangian	187
8.4.3	The Multiplier Function Method	188
9	Ordinary Differential Equations	197
9.1	Introduction	198
9.2	First-Order Equations	200
9.2.1	Euler's Method	200
9.2.2	Runge–Kutta Methods	202
9.2.3	Fourth-Order Runge–Kutta	204
9.2.4	Systems of First-Order Equations	206
9.2.5	Higher Order Equations	207
9.3	Boundary Value Problems	208
9.3.1	Shooting Method	208
9.3.2	Difference Equations	209
10	Eigenvalues and Eigenvectors	215
10.1	Introduction	215
10.2	The Characteristic Polynomial	217
10.3	The Power Method	218
10.3.1	Power Method, Theory	219
10.4	Eigenvalues of Special Matrices	222
10.4.1	Eigenvalues, Diagonal Matrix	222
10.4.2	Eigenvalues, Upper Triangular Matrix	223

10.5	A Simple QR Method	223
11	Statistics	231
11.1	Introduction	232
11.2	Statistical Terms	232
11.2.1	Random Variable	232
11.2.2	Frequency Distribution	232
11.2.3	Expected Value, Average and Mean	234
11.2.4	Variance and Standard Deviation	234
11.2.5	Covariance and Correlation	236
11.3	Least Squares Analysis	239
11.4	Random Numbers	241
11.4.1	Generating Random Numbers	242
11.5	Random Number Generators	243
11.5.1	Customising Random Numbers	243
11.6	Monte Carlo Integration	244
	Matlab Index	249
	Index	253

Numerical Methods with Worked Examples: Matlab
Edition

Woodford, C.; Phillips, C.

2012, X, 256 p. With online files/update., Hardcover

ISBN: 978-94-007-1365-9
