1	Introduction	1
1.1	What's in a name ... UAV or UAS?	1
1.2	Motivation and Rationale	3
1.3	On Regulating Safety	7
1.4	Book Objectives and Outline	8
	References	9
2	Aviation History and Unmanned Flight	11
2.1	Precursors of Flight and Unmanned Aircraft	11
2.2	1916–1944	14
2.3	The Machines of the Cold War	16
2.4	Modern Systems	21
2.5	Remarks	41
	References	41
3	Current Manned Aviation Regulation	43
3.1	Introduction	43
3.2	Airworthiness Certification	45
3.2.1	Type Certificate	45
3.2.2	Standard Certificates	46
3.2.3	Special Certificates	46
3.3	Special Aircraft Categories	48
3.3.1	Vehicles	48
3.3.2	R/C Models	49
3.4	Pilot Certification	49
3.5	FAR Operation Rules	50
3.5.1	Flight Rules	51
3.5.2	Emergency Rules	52
3.5.3	Maintenance Requirements	53
3.6	Airspace Classes	53
3.7	Regulation Development Models	55

References	55
4 Unmanned Aircraft Systems Regulation	57
4.1 Introduction	57
4.2 International Civil Aviation Organization	58
4.3 United States	59
4.3.1 RTCA	62
4.3.2 ASTM	63
4.3.3 SAE	64
4.3.4 Current Certification Paths and Operational Guidelines	64
4.4 Europe	66
4.4.1 EASA	66
4.4.2 EUROCONTROL	68
4.4.3 EUROCAE	68
4.4.4 Other European Union Activities	69
4.4.5 National Activities	71
4.5 Australia	72
4.6 Canada	73
4.7 Japan	74
4.8 International UAS Associations	75
4.9 Light and Small UAS	75
4.9.1 United States	75
4.9.2 Europe	76
4.10 Military Regulations	78
4.10.1 United States	78
4.10.2 Europe	81
4.10.3 NATO	82
References	83
5 UAS Safety Assessment and Functional Requirements	91
5.1 Equivalent Level of Safety	92
5.1.1 Manned Aviation Requirements	92
5.1.2 Derivation of an ELOS for UAS	93
5.2 UAS Accident Types	96
5.3 Ground Impact Fatality Risk Modeling	97
5.3.1 Ground Impact ELOS	99
5.3.2 Exposure to Ground Impact Accidents	100
5.3.3 Probability of Fatality of Exposed Persons	101
5.3.4 Frequency of Ground Impact Accidents	107
5.4 Mid-air Collision Fatality Risk Modeling	108
5.4.1 Mid-air Collision ELOS	108
5.4.2 Exposure and Risk of Fatality	110
5.4.3 Conflicting Trajectory Expectation	110
5.4.4 Collision Probability	111
5.5 Model Choice	112

5.6	Translating an Accident TLS to System Reliability Requirements . .	115
5.7	Risk Mitigation	121
	References	122
6	Case Studies	125
	References	159
7	Thoughts and Recommendations on a UAS Integration Roadmap . .	161
7.1	Regulation Development	162
7.1.1	Applications	163
7.1.2	Flight Characteristics	163
7.1.3	Sacrificability	163
7.1.4	Pilot Physically Removed from Cockpit	164
7.1.5	UAS as Systems	164
7.1.6	Take-off Weight	165
7.1.7	Passengers and Cargo	165
7.1.8	Payload	166
7.1.9	Operational Security	166
7.2	Operational Risk Reference System	166
7.3	UAS Classification	170
7.3.1	Classification Based on Ground Impact Risk	170
7.3.2	Classification Based on Mid-air Collision Risk	173
7.3.3	Classification Based on Autonomy	176
7.3.4	Other Classifications	177
7.4	Certification Paths	178
7.5	Equipment Certification	179
7.6	Operator Training and Certification	180
7.7	Technology Issues	181
7.7.1	Collision Avoidance	182
7.7.2	Sensors	185
7.7.3	Communications	186
7.7.4	Power and Propulsion Systems	186
7.7.5	Launch, Recovery and Flight Termination Systems	187
7.8	Technology Testing and Evaluation	187
	References	188
8	Epilogue	193
8.1	Why UAS?	193
8.2	UAS for Military Applications and Related Challenges	194
8.3	UAS for Civilian Applications: Challenges and Issues	196
8.4	Challenges, Enabling Technologies	200
8.5	The Road Ahead	201

On Integrating Unmanned Aircraft Systems into the
National Airspace System

Issues, Challenges, Operational Restrictions,
Certification, and Recommendations

Dalamagkidis, K.; Valavanis, K.; Piegls, L.A.

2012, XX, 308 p., Hardcover

ISBN: 978-94-007-2478-5
