<b>1</b>	<b>Introduction</b>	1
1.1	Motivation and History	1
1.2	Summary and Organization	7
1.3	Summary	11
<b>2</b>	<b>Literature Review</b>	13
2.1	Nerode <i>et al</i> Approach to Viability of Hybrid Systems [49], [70]	13
2.2	Aubin <i>et al</i> Approach to Viability of Hybrid Systems [15]	26
2.3	Deshpande–Varaiya Approach to Viability of Hybrid Systems [34]	31
2.4	Related Literature	38
2.5	Conclusion	43
<b>3</b>	<b>Hybrid Model</b>	45
3.1	Hybrid Phenomena and Hybrid Model	46
3.2	Hybrid Trajectories and their Ordering	59
3.3	Continuity, Fixed Points, and Correct Finite Control Automaton	67
3.4	Uncertainty in Hybrid Systems	70
3.5	The Three-Tank Problem	74
3.6	Nerode–Kohn Formalism for Hybrid Systems	79
3.7	Conclusion	87

<b>4</b>	<b>Viability</b>	89
4.1	Background	89
4.2	Time–Independent Viability Set	94
4.3	Fixed Point Approximation	96
4.4	Computation of TIC–COFPAA–I for Three Admissible Control Law Classes	101
4.4.1	Piecewise Constant Control	101
4.4.2	Piecewise Constant with Finite Switching	103
4.4.3	Piecewise Constant with Polynomial Control	107
4.5	Time–Dependent Viability Set	110
4.5.1	Piecewise Constant Control	113
4.6	Examples	115
4.6.1	Time–Independent Constraints	117
4.6.2	Time–Dependent Constraints	132
4.7	Conclusion	137
<b>5</b>	<b>Robust Viability</b>	139
5.1	Uncertainty and Robustness	140
5.2	Ordering of the Controllability Operator under Uncertainty	141
5.3	The Uncertain Controllability Operator and the Uncertainty Operator	142
5.4	Robust Viability	154
5.5	Robust Viability Control Design	155
5.6	Examples	156
5.7	Conclusion	161
5.8	Appendix	161
<b>6</b>	<b>Viability in Practice</b>	167
6.1	Reachable Set Computation of the Controllability Operator	167
6.2	Viable Cascade Control and Application to a Batch Polymerization Process [54], [55]	178
6.2.1	Batch Polymerization Process Model	179
6.2.2	Hybrid Model	181
6.2.3	Viable Cascade Control	182
6.2.4	Batch Polymerization Control	190

6.2.5	Discussion and Conclusions .....	194
6.2.6	Appendix .....	195
6.3	Conclusion .....	202
<b>7</b>	<b>An Operator Approach to Viable Attainability of Hybrid Systems [59] .....</b>	<b>203</b>
7.1	Introduction .....	204
7.2	Attainability and the Attainability Operator .....	205
7.3	Viable Attainability and the Viable Attainability Operator .....	210
7.4	Simulation Examples .....	213
7.5	Conclusion .....	216
<b>8</b>	<b>Some Topics Related to the Controllability Operator .....</b>	<b>217</b>
8.1	Topological Continuity Arising from Fixed Point Approximation Algorithm .....	217
8.2	The Lattice over Control Laws of the Controllability Operator .....	223
8.3	Homotopic Approximation under $PWC^{\Delta,k}$ and $PWCPC^{\Delta,k}$ .....	229
8.4	Conclusion .....	235
<b>9</b>	<b>Conclusions .....</b>	<b>237</b>
	<b>References .....</b>	<b>239</b>

Viability of Hybrid Systems  
A Controllability Operator Approach  
Labinaz, G.; Guay, M.  
2012, X, 246 p., Hardcover  
ISBN: 978-94-007-2520-1
