

# Contents

<b>1</b>	<b>Introduction</b>	1
1.1	Functional Diversity Approach to Quantify the Biodiversity	1
1.2	Functional Diversity Assessment	3
1.3	Classification of Ecosystem Services	4
1.4	Selection of Traits According to Ecosystem Service	4
1.5	Functional Diversity Quantification	5
	References	6
<b>2</b>	<b>Functional Groups</b>	9
2.1	Selecting Trait and its Relation With Ecosystem Services	9
2.2	A Guide for Data Arrangement	10
2.3	Statistical Procedures to Define Functional Groups	12
2.3.1	The Selection of a Dissimilarity Measure	12
2.3.2	Standardization	13
2.3.3	Choosing the Linkage Algorithm Method	14
2.3.4	Assessing the Number of Functional Groups	14
2.4	Functional Characterization of Coastal Sandy Plain Vegetation in Southeast Brazil	15
2.4.1	The Data Set	15
2.4.2	Plant Functional Types from a Restinga Vegetation	16
2.5	Functional Groups for Bird Species in Nicaragua	18
2.5.1	The Data Set	19
2.5.2	Bird Functional Types from Nicaragua	20
2.5.3	Characterization of Bird Functional Types of Nicaragua	20
2.5.4	Relationship of Functional Types with Land Uses	22
	References	23
