

Preface

Business Education is constantly looking for powerful practices to develop the future leaders, and business enterprises want to help graduates to become true experts. The book series *Advances in Business Education and Training* wants to contribute to this search and foster advancement in the field of business education and training. It is an international forum for scholarly and state-of-the-art research and development into all aspects of business education and training. In this way, the book series is one of the platforms of the Edineb-network (www.edineb.org) which brings together professionals in educational institutions and corporate learning centres, who strive for innovation in developing learning environments.

I am proud to present this book *Learning at the Crossroads of Theory and Practice*, the fourth in this series. We want to thank all the contributors for presenting a wide range of interesting ideas. We strongly believe that they offer valuable input to further our capabilities in tackling the challenges ahead. I also want to thank the people who are not so visible, but are indispensable for the success of this series: our reviewers. Below, you can find the names of the people who worked hard to deliver high-quality feedback to our authors. As you all know, this lays the foundation for expert performance. Thank you!
