
Contents

1	Introduction	1
1.1	What are ICC?	1
1.1.1	First Description of ICC by Cajal	1
1.1.2	Pacemaker Hypothesis	1
1.1.3	Finding of c-Kit in ICC	1
1.1.4	Definition and Developmental Origin	2
1.1.5	Distribution of ICC	2
1.1.6	Functional Role	2
1.2	Structure of the Gastrointestinal Tract	7
1.3	Nomenclature of ICC	11
1.4	Shape and Size of ICC	13
 Part I Distribution and Arrangement of ICC in the GI Tract		
2	Stomach	19
3	Small Intestine	31
4	Duodenum	53
5	Colon	63
6	Caecum	77
7	Ileocaecal Junction	81
8	ICC Found in the Submucosal Layer	85
 Part II Ultrastructural Demonstration of ICC and Allied Cells		
9	Ultrastructural Demonstration of ICC	95
9.1	Ultrastructural Characteristics of ICC	96
9.2	Ultrastructural Features of ICC-MP	103
9.3	Ultrastructural Features of ICC-CM and ICC-LM	103
9.4	Ultrastructural Features of ICC-DMP	103
9.5	Ultrastructural Features of ICC-SMP	103
9.6	Ultrastructural Features of ICC-SP	112

10	Signal Pathways Between Nerves and Muscles	
	Not Mediated by ICC	113
10.1	Ultrastructural Features of Fibroblast-Like Cells	113
10.2	PDGFR α Immunoreactive Cells	119
10.3	Direct Contacts Between Nerves and Muscles	120
11	Issues for Future Studies	125
11.1	Skepticism About the Roles of ICC	125
11.2	ICC Studies in the Human	125
11.3	Questions About Determining Factor(s) of the Ultrastructural Subtype	126
11.4	Questions About the Involvement of More Cell Types for Regulation of the Smooth Muscle	126
	References	129
	Index	133

Atlas of Interstitial Cells of Cajal in the Gastrointestinal
Tract

Komuro, T.

2012, XII, 134 p., Hardcover

ISBN: 978-94-007-2916-2
