

Contents

1	Green Chemistry for Green Treatment Technologies	1
1.1	Introduction	1
1.2	Green Chemistry	3
1.3	Green Technology	8
1.4	Concluding Remarks	11
	References	11
2	Removal of Emerging Contaminants from Water and Wastewater by Adsorption Process	15
2.1	Introduction	16
2.2	Adsorption Process	17
2.2.1	Mechanisms and Definitions	17
2.2.2	Adsorption Isotherms	18
2.2.3	Factors Affecting Adsorption	19
2.3	Removal of Emerging Compounds by Adsorption	20
2.3.1	Commercial Adsorbents	21
2.3.2	Low Cost Adsorbents	26
2.4	Adsorption as Green Technology	30
2.5	Concluding Remarks	32
	References	33
3	Removal of Trace Pollutants from Wastewater in Constructed Wetlands	39
3.1	Introduction	40
3.2	Constructed Wetlands	40
3.2.1	Technological Aspects	40
3.2.2	Drawbacks and Advantages	42
3.2.3	Plants Configuration	43
3.2.4	Worldwide Diffusion	44

3.3	Trace Pollutants Removal by CWs	46
3.3.1	Endocrine Disruptors Compounds (EDCs) Removal	46
3.3.2	Pharmaceuticals and Personal Care Products (PPCPs) Removal	48
3.4	Concluding Remarks	51
	References	52
4	Removal of Pesticides from Water and Wastewater by Solar-Driven Photocatalysis	59
4.1	Introduction	59
4.2	Solar Photocatalysis Fundamentals.	61
4.3	Solar Photocatalysis as Green Technology	62
4.4	Photocatalytic Degradation of Pesticides	65
4.5	Photocatalytic Degradation of Wastewater Containing Pesticides	70
4.6	Concluding Remarks	72
	References	74
5	Removal of Pharmaceuticals by Solar-Driven Processes	77
5.1	Introduction	78
5.2	Solar-Based Advanced Oxidation Methods	78
5.3	Treatment of Model Compounds	80
5.4	Toward Real Applications. Green Aspects of the Technology . . .	84
5.5	Photolysis of Pharmaceuticals	87
5.6	Concluding Remarks	88
	References	89
6	Outlook	93

Emerging Compounds Removal from Wastewater

Natural and Solar Based Treatments

Lofrano, G. (Ed.)

2012, XVIII, 94 p. 16 illus., 10 illus. in color., Softcover

ISBN: 978-94-007-3915-4
