

Contents

Enzymatic Polymerization of Phenolic Compounds	
by Oxidoreductases	1
1 Introduction	1
2 Mechanism of the Enzymatic Polymerization of Phenolic Compounds by Oxidoreductases	2
2.1 Mechanism of Laccases Catalysis	2
2.2 Mechanism of Peroxidases Catalysis	4
2.3 Mechanism of Phenols Polymerization	4
2.4 Linkages Implicated in Phenolic Compounds Polymerization	6
3 Different Systems of Polymerization	6
3.1 Monophasic System	8
3.2 Biphasic System	8
4 Effects of Operating Conditions on Enzymatic Polymerization of Phenolic Compounds	9
4.1 Effect of Enzyme	9
4.2 Effect of Substrate	29
4.3 Effect of pH	31
4.4 Effect of Ionic Species	31
4.5 Effect of Temperature	32
4.6 Effect of Solvent	33
4.7 Effect of Mediator	35
4.8 Effect of Conduit Mode	36
5 Effect of Enzymatic Polymerization on Phenolic Compounds Properties: Case of Flavonoids and Coumarins	37
5.1 Antioxidant Activity	38
5.2 Solubility	39
6 Conclusion	39
References	40
Index	47

Enzymatic polymerization of phenolic compounds by
oxidoreductases

Ghoul, M.; Chebil, L.

2012, V, 47 p. 9 illus., Softcover

ISBN: 978-94-007-3918-5
