Contents

1 Historical Notes and Fundamental Concepts 1
Problems 1
Supplement 1.1: Cosmic Rays and Astroparticle Physics 3
Solutions 6
References 8

2 Particle Interactions with Matter and Detectors 9
Problems 9
Supplement 2.1: Multiple Scattering at Small Angles 11
Supplement 2.2: Muon Energy Loss at High Energies 12
Solutions 13
References 18

3 Particle Accelerators and Particle Detection 19
Problems 19
Supplement 3.1: Synchrotron Radiation 24
Solutions 25
References 35

4 The Paradigm of Interactions: The Electromagnetic Case 37
Problems 37
Supplement 4.1: Radiocarbon Dating 40
Solutions 41
References 47

5 First Discussion of the Other Fundamental Interactions 49
Problems 49
Supplement 5.1: Baryon Number Conservation: the Search for Proton Decay 50
Solutions 53
References 57

6 Invariance and Conservation Principles 59
Problems 59
Solutions 60

7 Interactions of Hadrons at Low Energies and the Static Quark Model 65
Problems 65
Supplement 7.1: Sum of Angular Momentum and Isospin: the Clebsch–Gordan Coefficients 68
Solutions 69

8 Weak Interactions and Neutrinos 81
Problems 81
Supplement 8.1: Signals, Data Transmission and Electronics 86
Solutions 89
References 102

9 Discoveries in Electron–Positron Collisions 103
Problems 103
Supplement 9.1: Electronic Logic and Trigger 104
Solutions 107
References 111

10 High Energy Interactions and the Dynamic Quark Model 113
Problems 113
Supplement 10.1: The Computing Effort at the LHC Collider 116
Solutions 118
References 124

11 The Standard Model of the Microcosm 125
Problems 125
Solutions 126

12 CP-Violation and Particle Oscillations 129
Problems 129
Supplement 12.1: Analogy for the Neutrino Mixing 132
Supplement 12.2: Dirac or Majorana Neutrinos: the Double β Decay . . 133
Solutions 137
References 144

13 Microcosm and Macrocosm 145
Problems 145
Supplement 13.1: Cosmic Accelerators 148
Solutions 153
References 162

14 Fundamental Aspects of Nucleon Interactions 163
Problems 163
Supplement 14.1: Nuclear Collisions of Cosmic Rays During Propagation in the Galaxy 167

Supplement 14.2: Quantum Mechanics and Nuclear Physics → White Dwarfs and Neutron Stars 171
Solutions 174
References 180

References 181

Particles and Fundamental Interactions: Supplements, Problems and Solutions
A Deeper Insight into Particle Physics
Braibant, S.; Giacomelli, G.; Spurio, M.
2012, IX, 189 p. 55 illus., 6 illus. in color., Softcover
ISBN: 978-94-007-4134-8
