

Contents

1	Fundamentals of Risks Management Technologies	1
1.1	<i>Components of Risks Management Technologies</i>	1
1.2	<i>Risks Management Technologies for Solving Difficult Problems</i>	3
1.3	Data Structure and Statistical Database	6
1.4	Events-Parameters and Events-Gradations	8
1.5	Transition from Database to Knowledge Base	9
1.6	Variables in Risk LP-Risk Model	10
1.7	Two Types of Events in the Tabular Database	11
1.8	Incompatible Events Groups	13
1.9	Knowledge Base and Systems of <i>L-Equations</i>	15
1.10	Classes of <i>LP-Risk Models</i> in <i>Risks Management Technologies</i>	16
1.11	Procedures of <i>Risks Management Technologies</i>	19
1.12	Connection of LP-Risk Models of Different Classes	20
1.13	Addition of Events in Risk Problems	22
1.14	Subjects of Research and Developments	24
1.15	Not Lost Knowledge	26
1.16	<i>LP-Calculus in Risks Management Technologies</i>	27
2	Building LP-Risk Models of LP-Modeling Class	29
2.1	Perfect Disjunctive Normal Form	30
2.2	The Shortest Paths of Successful Operation	30
2.3	Minimal Failure Cross-Sections	31
2.4	Associative <i>LP-Risk Models</i>	31
2.5	Tabular Form of the <i>LP-Risk Model</i>	32
2.6	Risk and Efficiency Model for Several Aims	33
2.7	Scenarios and <i>LP-Risk Models</i> in Students' Projects	35
2.8	Building Composite <i>LP-Risk Models</i>	35
2.9	Complex <i>LP-Risk Models</i>	36
2.10	Dynamic <i>LP-Risk Model</i>	42

3	Building LP-Risk Model of LP-Classification Class	43
3.1	Formulation of the Identification Task	44
3.2	Particularly of Task and Training Methods	45
3.3	Iterative Algorithm of Identification	46
3.4	Research Results	48
3.5	Computational Complexity of Algorithms	50
3.6	Accuracy of Training and Testing of <i>LP-Risk Models</i>	50
4	Building LP-Risk Models of LP-Efficiency and LP-Forecasting Classes	61
4.1	Significance of <i>LP-Models</i> for Applications	61
4.2	<i>LP-Models</i> of <i>LP-Efficiency Class</i>	62
4.3	<i>LP-Models</i> of <i>LP-Forecasting Class</i>	64
5	LP-Analysis of Risk and Efficiency in Systems	67
5.1	<i>LP-Analysis</i> in <i>LP-Modeling Class</i>	68
5.2	<i>LP-Analysis</i> in <i>LP-Classification Class</i>	69
5.3	<i>LP-Analysis</i> in <i>LP-Efficiency Class</i>	71
5.4	<i>LP-Analysis</i> in <i>LP-Forecasting Class</i>	72
6	LP-Management of Risk and Efficiency	75
6.1	<i>LP-Management</i> in <i>LP-Modeling Class</i>	75
6.2	<i>LP-Management</i> in <i>LP-Classification Class</i>	76
6.3	<i>LP-Management</i> in <i>LP-Efficiency Class</i>	77
6.4	<i>LP-Management</i> in <i>LP-Forecasting Class</i>	77
6.5	Operative <i>LP-Management</i> of Risk and Efficiency	78
6.6	Strategic <i>LP-Management</i> of Risk and Efficiency	78
7	LP-Forecasting of Risk and Crisis in Systems	81
7.1	<i>LP-Forecasting</i> in <i>LP-Modeling Class</i>	81
7.2	<i>LP-Forecasting</i> in <i>LP-Classification Class</i>	82
7.3	<i>LP-Forecasting</i> in <i>LP-Efficiency Class</i>	83
7.4	<i>LP-Forecasting</i> in <i>LP-Forecasting Class</i>	84
7.5	<i>LP-Forecasting</i> Without Incorrect Data	85
7.6	<i>LP-Forecasting</i> of Technical System Wear	87
7.7	<i>LP-Forecasting</i> by Weights of Distributions of Initiating Parameters	89
8	Software for Risks Management Technologies	93
8.1	Software for <i>LP-Modeling Class</i>	93
8.2	Software for <i>LP-Classification Class</i>	97
8.3	Software for <i>LP-Efficiency Class</i>	99
8.4	Software for <i>LP-Forecasting Class</i>	100
9	Axioms and Definitions of Risks Management Technologies	103
9.1	Basic Axioms	103
9.2	Axioms of <i>LP-Calculus</i> by Ryabinin	104
9.3	Axioms and Theorems of <i>Risks Management Technologies</i>	105

9.4	The Basic Definitions of <i>Risks Management Technologies</i>	110
9.5	Differences and Special Features of <i>Risks Management Technologies</i>	113
9.6	Formal Risk Theory for the <i>LP-Classification Class</i>	114
10	Risk Management Technology of Building Company	123
10.1	Improving Management of Company	123
10.2	<i>LP-Model</i> of Company Failure Risk	124
10.3	<i>LP-Risk Model</i> of Failure of Solving Tasks of Company	127
10.4	Strategic LP-Management of Company Development	128
11	Risk Management Technology of Transport Company	131
11.1	Models of Company Risk and Efficiency	131
11.2	<i>LP-Model</i> of Company Failure Risk	133
11.3	<i>LP-Analysis</i> Failure Risk of Branches Company	136
11.4	Analysis of Company Efficiency on External Factors	139
11.5	Analysis of Company Efficiency on Internal Factors	143
11.6	Conclusions	145
12	Risks Management Technologies for Analysis of Company Efficiency	147
12.1	Traditional Data Analysis	147
12.2	Transition from Data Base to Knowledge Base	148
12.3	Frequency Analysis of Data	149
12.4	Logical-Probabilistic Analysis	151
13	Credit Risks Management Technology	153
13.1	Problem Statement	153
13.2	Choice of Admissible Credit Risk	154
13.3	Price for Risk	155
13.4	Accuracy and Robustness of <i>LP-Model</i> of Credit Risk	155
13.5	Transparency of <i>LP-Model</i> of Credit Risk	158
13.6	Variables Dependence Analysis in <i>LP-Models</i>	159
13.7	Recommendations Concerning Training and Testing Model	162
14	Portfolio Risk Management Technology	165
14.1	Problem Statement	165
14.2	Optimum Portfolio Choice	166
14.3	<i>LP-Models</i> of Portfolio Risk	167
14.4	<i>LP-Analysis</i> of Portfolio Risk and Efficiency	168
14.5	Portfolio Risk Management	170
15	Risks Management Technology of Company Management	173
15.1	Problem State	173
15.2	Management Failure Risk by Functions	174
15.3	Management Failure Risk by Business Directions	174
15.4	Management Failure Risk in Achieving Group of Aims	175
15.5	Management of Company Performance Quality	177

16	Logical Probabilistic Models of Banks Operational Risks	179
16.1	LP-Failure Risk Model for Solving the Operation Risk Problem	179
16.2	Capital Reserve by the Standardized Basel's Method	182
16.3	Capital Reserve by the Advanced Basel's Method	183
16.4	Logical and Probabilistic Basis for Evaluating the OPR and Capital Reserve	185
16.5	LP-Models of Operational Risk by Standardized Methods	186
16.6	OPR LP-Models by Advanced Methods	189
16.7	Reservation by LP-Model of the Standardized Method	189
16.8	Reservation by LP-Model of the Advanced Method	190
16.9	LP-Analysis of Operational Risk	190
16.10	The LP-Bank Risk Model with the LP-Models of OPR and External Events	192
16.11	Complex Risk Model with LP-Models of OPR and Other Risk Types	194
16.12	Assessment of Probabilities of Events by Expert Information . . .	196
17	Risks Management Technologies of Counteracting Bribery and Corruption	201
17.1	Problem State	202
17.2	<i>LP-Model of Bribery Risk</i> in Institution	203
17.3	<i>LP-Model of Risk</i> of Officials' Bribery and Fraud	205
17.4	<i>LP-Model of Bribes Risk</i> in Service	208
17.5	Example of Analyzing Bribery Risk in Kindergarten	208
18	Invalidity Risks Management Technologies of Systems for Standard ISO 9001-2008	213
18.1	Systematizations Regard to Building LP-Invalidity Models	214
18.2	Standard LP-Model for Systems and Processes Invalidity Risk . .	216
18.3	LP-Model of Plant Electric Power Supply System Validity	222
18.4	LP-Model of Invalidity of Preventing Ammunition Depot Explosion	225
18.5	Software for LP-Models of Invalidity Risk	227
19	Risks Management Technologies of Restaurant	231
19.1	Parameters and Their Gradations	231
19.2	Data and Knowledge About Conditions of Restaurant	232
19.3	Frequency Analysis of Risk and Efficiency	233
19.4	LP-Analysis of Restaurant Risk and Efficiency	235
19.5	Analysis of Risk and Efficiency by Parameters Contributions . . .	237
20	Risks Management Technology for Insurance of Fire Hazardous Objects	241
20.1	Problem Setting and Description	241
20.2	Scenario of Explosion and Fire Risk	243
20.3	Logical Risk Function	244
20.4	Probabilistic Risk Function	245

21	Risks Management Technology for a Bank	247
21.1	<i>LP-Model of Bank Failure Risk</i>	247
21.2	Objects in Problem of Bank Risk Management	248
21.3	Subjects in Problem of Managing Risk of Bank	249
22	Assessment of Events Probabilities on Expert Information	253
22.1	LP-Model “The Successful Development of Russia”	253
22.2	<i>Assessment of Events Probabilities</i>	257
22.3	<i>The Direct Assessment of Events Probabilities</i>	257
22.4	<i>The Inverse Assessment of Events Probabilities and Losses</i>	258
22.5	The Method of Summary Indexes	260
22.6	Decision Taking Support System ASPID-3W	264
22.7	Assessment of Hypotheses Probabilities by One Expert	267
22.8	Assessment of Hypotheses Probabilities by Expert Group	269
23	Training Course: Risks Management Technologies	275
23.1	Aims and Tasks of the Training Course	275
23.2	Lecture Topics	276
23.3	Laboratory Works	278
23.4	Test and Exam Questions	279
23.5	Some Information from Logic Algebra	281
24	Risks Management Technologies as Business Object	289
24.1	Why Would Buy This Book?	289
24.2	Application of <i>Risks Management Technologies</i>	290
24.3	Innovations	292
24.4	<i>Risks Management Technologies</i> as Business Object	293
24.5	Suggestions Concerning Development of <i>Risks Management Technologies</i>	294
	References	297
	Index	303

Risk Management Technologies
With Logic and Probabilistic Models

Solozhentsev, E.D.

2012, XXII, 306 p., Hardcover

ISBN: 978-94-007-4287-1
