

# Contents

<b>1</b>	<b>Bringing Vascular Biomechanics into Clinical Practice. Simulation-Based Decisions for Elective Abdominal Aortic Aneurysms Repair</b>	<b>1</b>
	T. Christian Gasser	
<b>2</b>	<b>A Subject-Specific Framework to Inform Musculoskeletal Modeling: Outcomes from the IUPS Physiome Project</b>	<b>39</b>
	J. Fernandez, P. Hunter, V. Shim, and K. Mithraratne	
<b>3</b>	<b>Patient Specific Computational Modeling in Cardiovascular Mechanics</b>	<b>61</b>
	Arthur Creane, Daniel J. Kelly, and Cairtróna Lally	
<b>4</b>	<b>Modeling the Human Heart Under Acute Ischemia</b>	<b>81</b>
	E.A. Heidenreich, J.M. Ferrero, and J.F. Rodríguez	
<b>5</b>	<b>Detailing Patient Specific Modeling to Aid Clinical Decision-Making</b>	<b>105</b>
	S. Richmond, A.M. Al Ali, L. Beldie, Y.T. Chong, A. Cronin, J. Djordjevic, N.A. Drage, D.M. Evans, D. Jones, Y. Lu, D. Marshall, J. Middleton, G. Parker, L. Paternoster, R.A. Playle, H. Popat, P.L. Rosin, K. Sidorov, A.M. Toma, B. Walker, C. Wilson, and A.I. Zhurov	
<b>6</b>	<b>Computational Analysis of Flow and Stress Patterns in Patient Specific Thoracic Aortic Aneurysm Models</b>	<b>133</b>
	Alessandro Borghi, Nigel B. Wood, Raad H. Mohiaddin, and Xiao Yun Xu	
<b>7</b>	<b>Patient-Specific Biomechanical Framework for Aiding Clinical Decisions in Eye Surgery</b>	<b>161</b>
	E. Lanchares, M. Malvè, and B. Calvo
