

Contents

1	Introduction	1
2	Multistage Regression (35 Patients)	3
	Example	3
	Path Statistics	5
	Two Stage Least Square Method	6
	Conclusion	6
3	Multivariate Analysis Using Path Statistics (35 Patients)	7
	Example	7
	Conclusion	11
4	Multivariate Analysis of Variance (35 and 30 Patients)	13
	First Example	13
	Second Example	17
	Conclusion	19
5	Categorical Data (60 patients)	21
	Example	21
	Conclusion	24
6	Multinomial Logistic Regression (55 Patients)	25
	Example	25
	Conclusion	28
7	Missing Data Imputation (35 Patients)	29
	Example	29
	Regression Imputation	30
	Multiple Imputations	32
	Conclusion	33

8	Comparing the Performance of Diagnostic Tests (650 and 588 Patients)	35
	Example	35
	Conclusion	37
9	Meta-Regression (20 and 9 Studies)	39
	Example 1	39
	Example 2	41
	Conclusion	42
10	Poisson Regression (50 and 52 Patients)	43
	Example 1	43
	Example 2	46
	Conclusion	48
11	Confounding (40 patients)	49
	Example	49
	Conclusion	53
12	Interaction, Random Effect Analysis of Variance (40 Patients)	55
	Example	56
	Conclusion	60
13	Log Rank Testing (60 Patients)	61
	Example	61
	Log Rank Test	63
	Conclusion	63
14	Segmented Cox Regression (60 Patients)	65
	Example	65
	Conclusion	68
15	Curvilinear Estimation (20 Patients)	69
	Example	69
	Conclusion	73
16	Loess and Spline Modeling (90 Patients)	75
	Example	75
	Spline Modeling	78
	Loess (Locally Weighted Scatter Plot Smoothing) Modeling	79
	Note	80
	Conclusions	80

17	Assessing Seasonality (24 Averages)	81
	Example	82
	Conclusions.	85
18	Monte Carlo Tests and Bootstraps for Analysis of Complex Data (10, 20, 139, and 55 Patients)	87
	Paired Continuous Data	87
	Unpaired Continuous Data	88
	Paired Binary Data.	88
	Unpaired Binary Data.	90
	Conclusion	90
19	Artificial Intelligence (90 Patients)	91
	Example	91
	Conclusion	94
20	Robust Testing (33 Patients)	95
	Example	95
	Robust Testing	97
	Conclusion	98
	Final Remarks	99
	Index	101

SPSS for Starters, Part 2

Cleophas, T.J.; Zwinderman, A.H.

2012, IX, 104 p. 20 illus., Softcover

ISBN: 978-94-007-4803-3
