

Contents

1	A General Introduction to MicroRNAs, Their Investigation and Exploitation in CHO Cell Lines	1
	Lyne Jossé, Lin Zhang and C. Mark Smales	
2	Biogenesis of Mammalian miRNA	15
	Stephen L. Clarke, McKale R. Davis and Ramanjulu Sunkar	
3	Target Prediction Algorithms and Bioinformatics Resources for miRNA Studies	29
	Colin Clarke, Niall Barron, Mark Gallagher, Michael Henry, Paula Meleady and Martin Clynes	
4	The CHO miRNA Transcriptome	49
	Matthias Hackl, Nicole Borth and Johannes Grillari	
5	MicroRNAs as Engineering Targets	65
	Aliaksandr Druz, Michael Betenbaugh and Joseph Shiloach	
6	MicroRNAs for Enhancement of CHO Cell Proliferation and Stability: Insights from Neuroblastoma Studies	87
	Raymond L. Stallings	
7	MicroRNA Detection Methods for Mammalian Cell Lines and Their Applications in Therapeutic Protein Production	99
	Nan Lin and Carol Kreader	
8	Manipulating Levels of Specific MicroRNAs in Mammalian Cells	113
	Carol Kreader and Nan Lin	
	Index	123

MicroRNAs as Tools in Biopharmaceutical Production

Barron, N. (Ed.)

2012, X, 126 p., Hardcover

ISBN: 978-94-007-5127-9
