## Part I Rethinking Philosophy of Engineering and Development

<b>Introduction.....</b>	<b>2</b>
Erich W. Schienke and Brent K. Jesiek	
<b>1 Turning Engineering Green: Sustainable Development and Engineering Education.....</b>	<b>7</b>
Andrew Jamison	
<b>2 From a Micro–Macro Framework to a Micro–Meso–Macro Framework .....</b>	<b>23</b>
Bocong Li	
<b>3 Traditional Chinese Thinking and Its Influence on Modern Engineering and Social Development.....</b>	<b>37</b>
Qian Wang and Qin Zhu	
<b>4 Engineering and Development in Modern China: Challenges and Responses .....</b>	<b>47</b>
Xiaonan Hong and Li Ma	
<b>5 “Ecocity China”: An Ethos Under Development .....</b>	<b>69</b>
Erich W. Schienke	
<b>6 Negotiated Development: Rediscovering a Global Development Ethic.....</b>	<b>87</b>
Peter McEvoy, Jane Grimson, and William Grimson	

## Part II Rethinking Engineering Education

<b>Introduction.....</b>	<b>104</b>
Andrew Jamison and Yi Shen	

<b>7</b>	<b>The Challenge of Educating Engineers for a Close, Crowded and Creative World .....</b>	<b>109</b>
	Ela Krawczyk and Mike Murphy	
<b>8</b>	<b>Educating Chinese Engineers: The Case of Shanghai Jiao Tong University During 1896–1949 .....</b>	<b>123</b>
	Brent K. Jesiek and Yi Shen	
<b>9</b>	<b>Academic Drift in European Professional Engineering Education: The End of Alternatives to the University? .....</b>	<b>145</b>
	Steen Hyldgaard Christensen	
<b>10</b>	<b>Governing Engineering.....</b>	<b>169</b>
	Anders Buch	
<b>11</b>	<b>Historical Tensions in Engineering Education: European Perspectives.....</b>	<b>183</b>
	Andrew Jamison and Matthias Heymann	
<b>12</b>	<b>Socio-technical Integration in Engineering Education: A Never-Ending Story.....</b>	<b>197</b>
	Steen Hyldgaard Christensen and Erik Ernø-Kjølhed	
<b>13</b>	<b>Tensions in Developing Engineering Design Competencies .....</b>	<b>215</b>
	Ulrik Jørgensen	
<b>14</b>	<b>The Local Engineer: Normative Holism in Engineering Formation .....</b>	<b>233</b>
	Gary Lee Downey	
<b>15</b>	<b>Eyes Wide Shut? Loyalty and Practical Morality in Engineering Education.....</b>	<b>253</b>
	Martine Buser and Christian Koch	
<b>Part III Rethinking Perspectives on Engineering, Nature, and Society</b>		
	<b>Introduction.....</b>	<b>270</b>
	Martin Meganck and Yanming An	
<b>16</b>	<b>Ex-students Engaged in “Engineers Without Borders”: What Have They Become? .....</b>	<b>275</b>
	Christelle Didier	
<b>17</b>	<b>Socio-Technical Integration: Research Policies in the United States, European Union, and China .....</b>	<b>291</b>
	Hannot Rodríguez, Hu Mingyan, and Erik Fisher	

<b>18 Inheritance Ethics in Engineering Development: Comparison Between Shenyang and Ruhr on Industrial Heritage Conservation.....</b>	<b>305</b>
Jian Wang and Jia Chen	
<b>19 Dam Construction Ethics in China .....</b>	<b>317</b>
Zhihui Zhang	
<b>20 The Development of Railroads in the United States and China .....</b>	<b>329</b>
Nan Wang	
<b>21 Engineering Leadership .....</b>	<b>341</b>
Mike Murphy and Eugene Coyle	
<b>22 Harmonization with Nature: Ancient Chinese Views and Technological Development .....</b>	<b>357</b>
Guoyu Wang and Yuan Zhu	
<b>23 Lynn White Revisited: Religious and Cultural Backgrounds for Technological Development.....</b>	<b>379</b>
Martin Meganck	
<b>Author Biographies .....</b>	<b>397</b>
<b>Index.....</b>	<b>405</b>

Engineering, Development and Philosophy  
American, Chinese and European Perspectives  
Christensen, S.H.; Mitcham, C.; Li, B.; An, Y. (Eds.)  
2012, XXVIII, 412 p., Hardcover  
ISBN: 978-94-007-5281-8
