1 The Difficult Airway: Definitions and Algorithms	1
---	---

Zdravka Zafirova and Avery Tung

Introduction	1
Definitions	2
Incidence	3
Algorithms for Addressing the Difficult Airway	4
Conclusion	9
References	9

2 The Expected Difficult Airway	11
---------------------------------------	----

Satya Krishna Ramachandran and Sachin Kheterpal

Introduction	12
Anatomy of the Difficult Airway	12
Factors Affecting Tongue-Pharyngeal Volume Disproportion	13
Factors Affecting Access to the Upper Airway	13
Factors Affecting Laryngoscopic Visualization Vector	14
Factors Affecting Laryngeal Structures	19
Anatomy and Physiology of the Compromised and Critical Airway	19
Clinical Assessment of the Airway	21
Systemic Conditions	22
Airway Tumors	23
Upper Airway Infections	25
Specific Airway Assessment	26
Measures of Tongue-Pharyngeal Volume Disproportion	26
Measures of Laryngoscopic Visualization Vector	27
Other Airway-Related Tests	27

Clinical Prediction of the Difficult Airway	28
Clinical Prediction of Difficult Intubation	28
Clinical Prediction of Difficult Mask Ventilation	29
Difficult Mask Ventilation Combined with Difficult Intubation	29
Clinical Prediction of Need for Awake Surgical Airway	29
Summary	30
References	30

3 The Role of Awake Intubation..... 33

P. Allan Klock Jr.

Introduction	33
Indications for Awake Intubation	35
Contraindications to Awake Intubation	36
Advantages of Awake Tracheal Intubation	36
Keys to Successful Awake Intubation	37
Psychological Preparation	37
Dry the Airway	37
Supplemental Oxygen	37
Anxiolysis and Sedation	38
Anesthesia of the Airway	38
Applied Airway Anatomy	39
Topical Anesthesia of the Tongue	39
Intubating the Trachea	45
References	46

4 Unanticipated Difficult Direct Laryngoscopy: Methods to Improve Its Success 47

Mark E. Nunnally and Michael R. Hernandez

Introduction	48
Lingual Tonsil Hyperplasia	49
Copious Blood and Secretions	49
Blades	49
Shape	49
Construction	52
Lights	52
Adjuncts to Direct Laryngoscopy	53
Stylets and Introducers	53
Laryngoscope Optical Modifications	54
Technique of Direct Laryngoscopy	54
Sniffing Position	55
Head Extension	55
Neck Flexion	55
Obesity and the Sniffing Position	56
Laryngeal Manipulation	56
Cervical Spine Injury	58
Techniques for Difficult Laryngoscopy	59
Complications	60
Conclusion	60
References	60

5 The Role of Rigid Fiberoptic Laryngoscopes..... 65

Richard M. Cooper

Introduction	65
Limitations of Direct (Line-of-Sight) Laryngoscopy	66
Rigid Fiberoptic Laryngoscopes	66
UpsherScope	67
WuScope™	67
Bullard	68
Truview EVO2™	73
Conclusion	74
References	74

6 Role of Rigid Video Laryngoscopy..... 77

Richard M. Cooper and Corina Lee

Introduction	77
Channeled Scopes	78
Airtraq	78
Pentax AWS100	84
Non-channeled Scopes	87
GlideScope™ Video Laryngoscope (GVL™)	87
Visualization	92
ETT Delivery	93
ETT Advancement	94
Clinical Applications	95
McGrath® Series 5	99
Clinical Applications	101
Video Macintosh/C-MAC	102
Conclusion and Future Directions	106
References	107

7 The Role of the Supraglottic Airway 113

Irene P. Osborn

Introduction	113
Basic Use	115
The LMA as a Rescue Device	117
Flexible Bronchoscopic Intubation Via the SGA	117
Other Supraglottic Airways for Intubation	119
Awake Placement of the Laryngeal Mask	120
The Intubation LMAs (Fastrach™ and CTrach™)	121
The Intubating LMA (Fastrach™)	121
LMAs with Gastric Access	125
The LMA ProSeal™	125
LMA Supreme™	126
Intubating Through LMAs (Classic, Supreme, and ProSeal: Using the Aintree Intubation Catheter)	128
Conclusion	129
References	130

8 The Role of Flexible Bronchoscopy 133

David B. Glick

Introduction	134
Equipment Necessary for Fiberoptic Intubation	134
Additional Supplies Necessary for Flexible Bronchoscopy	137
The Intubating Airway	137
Other Common Contents of the Cart	137
Setting up for Fiberoptic Intubation	138
Techniques for Fiberoptic Intubation	138
Asleep Oral Intubation	138
Asleep Nasal Intubation	145
Awake Fiberoptic Intubation	149
Awake Oral Fiberoptic Intubation	149
Awake Nasal Fiberoptic Intubation	151
Fiberoptic Bronchoscopy in Combination with Other Airway Management Techniques	152
Fiberoptic Intubation Through the Laryngeal Mask Airways	154
Complications Associated with Fiberoptic Intubations	158
References	160

9 The Role of Optical Stylets 161

Richard Levitan

Introduction	162
Design Variation	162
Principles of Optical Stylets and Progressive Visualization	166
Patient Positioning	169
Tube Tip Design and Relevance to Optical Stylets	169
Mechanics and Tube Delivery Issues	170
Oxygen Ports	171
Cleaning	171
Combining Optical Stylets with Supraglottic Airways	171
Specific Uses of the Different Instruments, Pediatric Versions	172
Literature Reports of Optical Stylets	172
Bibliography	173
General or Multi-device Review	173
Bonfils	173
Levitan	174
Shikani	174
Manufacturer's Web Sites	175

10 The Role of the Lightwand..... 177

Ashutosh Wali

Introduction	177
Principle	179
Assembly and Positioning	179
Method	180
Orotracheal Intubation	180
Nasotracheal Intubation	182
Literature Review	185
Indications	188
Problems	188
Conclusion	188
References	189

11 Role of Retrograde Intubation..... 191

Martin Dauber

Introduction	191
Historical Development	192
Techniques	193
Contraindications to Retrograde Intubation	197
Applications for this Technique	197
Conclusion	199
References	199

12 The Role of the Combitube and Laryngeal Tube..... 201

Michael Woo and Michael F. O'Connor

Introduction	202
Indications	202
Placement of the Esophageal Combitube	202
Placement Phase	204
Placement with Laryngoscope, Vocal Cords Visualized	204
Blind Placement, with Laryngoscope, Blind Placement, without Laryngoscope	204
Modified Lipp Maneuver	205
Ventilation Phase	205
Emergent	205
Non-emergent	206
Lateral Placement to Avoid Tongue Engorgement	206
Minimal Leakage Technique to Avoid Tongue Engorgement	206
Complications Associated with Combitube Use	206
Ninth and Twelfth Cranial Nerve Dysfunction	206
Esophageal Perforation	206
Pyriiform Sinus Perforation	206
Endotracheal Intubation After Combitube Placement	207
Next Generation Devices	208
EasyTube	208
King LT, LT-D, LTS-D	208
Conclusion	208
References	208

13 The Role of Transtracheal Jet Ventilation 211

Julio Cortiñas-Díaz and Seth Manoach

Introduction	212
Indications for TTJV	212
Contraindications	214
Equipment	214
Gas Source	215
Pressure-Flow Regulators	217
Gas Conduits	219
Types of Catheter	221
Anatomy	223
Technique for Performing Cricothyroid Puncture and Tracheal Catheterization	225
Ventilation Technique	230
Complications	231
Analysis and Prevention of Complications	231

Drawbacks of TTJV with Respect to Surgical or Dilatational	
Cricothyroidotomy	235
Appendix: Approximate Measures of Pressure	235
Physiology and Mechanism of Action	235
Maintaining One's Skills	237
References	237

14 The Role of Surgical Airway Access 241

Kerstin M. Stenson

Introduction	241
Rigid Endoscopy	242
Cricothyroidotomy	244
Tracheotomy	246
Extraordinary Circumstances	249
Conclusion	251
References	251

15 Evaluation and Management of the Difficult Pre-Hospital Airway 253

Janis P. Tupesis and Nathan Van Dyk

Introduction	254
Emergency Medical Services Systems	255
Evaluation and Approach	257
Management	259
Patient Positioning	259
Bag-Mask Ventilation	260
Combitube™	261
LMA™	262
Laryngeal Tube™	263
Glottic Devices	264
Conclusion	269
References	269

16 Extubation of the Difficult Airway 271

Louise Ellard and Richard M. Cooper

Introduction	271
Summary of Extubation Problems	272
Risk Stratification of Extubation	273
Surgical Procedures Associated with High-Risk Extubations	273
Medical Conditions Associated with High-Risk Extubations	277
Strategies to Manage Extubation of the Difficult Airway	278
Exchange for a Supraglottic Airway	279
Extubation over a Flexible Bronchoscope	279
Airway Exchange Devices and Jet Ventilation via These Devices	279
Oxygenation	281
Conclusion	281
References	284

Index 289

The Difficult Airway

An Atlas of Tools and Techniques for Clinical
Management

Glick, D.B.; Cooper, R.M.; Ovassapian, A. (Eds.)

2013, XVIII, 295 p., Hardcover

ISBN: 978-0-387-92848-7
