

# Contents

- 1 An Invitation to Compressive Sensing**..... 1
  - 1.1 What is Compressive Sensing?..... 1
  - 1.2 Applications, Motivations, and Extensions ..... 8
  - 1.3 Overview of the Book ..... 23
  - Notes..... 33
- 2 Sparse Solutions of Underdetermined Systems** ..... 41
  - 2.1 Sparsity and Compressibility ..... 41
  - 2.2 Minimal Number of Measurements ..... 48
  - 2.3 NP-Hardness of  $\ell_0$ -Minimization ..... 53
  - Notes..... 56
  - Exercises ..... 57
- 3 Basic Algorithms**..... 61
  - 3.1 Optimization Methods ..... 61
  - 3.2 Greedy Methods ..... 65
  - 3.3 Thresholding-Based Methods ..... 69
  - Notes..... 71
  - Exercises ..... 73
- 4 Basis Pursuit** ..... 77
  - 4.1 Null Space Property ..... 78
  - 4.2 Stability ..... 82
  - 4.3 Robustness ..... 85
  - 4.4 Recovery of Individual Vectors ..... 90
  - 4.5 The Projected Cross-Polytope..... 98
  - 4.6 Low-Rank Matrix Recovery ..... 102
  - Notes..... 104
  - Exercises ..... 105
- 5 Coherence** ..... 111
  - 5.1 Definitions and Basic Properties ..... 111
  - 5.2 Matrices with Small Coherence ..... 113

5.3	Analysis of Orthogonal Matching Pursuit .....	123
5.4	Analysis of Basis Pursuit .....	124
5.5	Analysis of Thresholding Algorithms .....	126
	Notes .....	128
	Exercises .....	129
<b>6</b>	<b>Restricted Isometry Property .....</b>	<b>133</b>
6.1	Definitions and Basic Properties .....	133
6.2	Analysis of Basis Pursuit .....	141
6.3	Analysis of Thresholding Algorithms .....	148
6.4	Analysis of Greedy Algorithms .....	156
	Notes .....	168
	Exercises .....	170
<b>7</b>	<b>Basic Tools from Probability Theory .....</b>	<b>175</b>
7.1	Essentials from Probability .....	175
7.2	Moments and Tails .....	185
7.3	Cramér's Theorem and Hoeffding's Inequality .....	188
7.4	Subgaussian Random Variables .....	191
7.5	Bernstein Inequalities .....	196
	Notes .....	198
	Exercises .....	199
<b>8</b>	<b>Advanced Tools from Probability Theory .....</b>	<b>201</b>
8.1	Expectation of Norms of Gaussian Vectors .....	202
8.2	Rademacher Sums and Symmetrization .....	205
8.3	Khintchine Inequalities .....	206
8.4	Decoupling .....	211
8.5	Noncommutative Bernstein Inequality .....	217
8.6	Dudley's Inequality .....	224
8.7	Slepian's and Gordon's Lemmas .....	227
8.8	Concentration of Measure .....	237
8.9	Bernstein Inequality for Suprema of Empirical Processes .....	247
	Notes .....	260
	Exercises .....	265
<b>9</b>	<b>Sparse Recovery with Random Matrices .....</b>	<b>271</b>
9.1	Restricted Isometry Property for Subgaussian Matrices .....	272
9.2	Nonuniform Recovery .....	281
9.3	Restricted Isometry Property for Gaussian Matrices .....	291
9.4	Null Space Property for Gaussian Matrices .....	293
9.5	Relation to Johnson–Lindenstrauss Embeddings .....	298
	Notes .....	302
	Exercises .....	306

<b>10</b>	<b>Gelfand Widths of <math>\ell_1</math>-Balls</b>	311
10.1	Definitions and Relation to Compressive Sensing	311
10.2	Estimate for the Gelfand Widths of $\ell_1$ -Balls	317
10.3	Applications to the Geometry of Banach Spaces	322
	Notes	327
	Exercises	328
<b>11</b>	<b>Instance Optimality and Quotient Property</b>	331
11.1	Uniform Instance Optimality	332
11.2	Robustness and Quotient Property	337
11.3	Quotient Property for Random Matrices	343
11.4	Nonuniform Instance Optimality	358
	Notes	362
	Exercises	363
<b>12</b>	<b>Random Sampling in Bounded Orthonormal Systems</b>	367
12.1	Bounded Orthonormal Systems	368
12.2	Uncertainty Principles and Lower Bounds	374
12.3	Nonuniform Recovery: Random Sign Patterns	384
12.4	Nonuniform Recovery: Deterministic Sign Patterns	392
12.5	Restricted Isometry Property	404
12.6	Discrete Bounded Orthonormal Systems	416
12.7	Relation to the $A_1$ -Problem	418
	Notes	420
	Exercises	431
<b>13</b>	<b>Lossless Expanders in Compressive Sensing</b>	435
13.1	Definitions and Basic Properties	435
13.2	Existence of Lossless Expanders	439
13.3	Analysis of Basis Pursuit	443
13.4	Analysis of an Iterative Thresholding Algorithm	447
13.5	Analysis of a Simple Sublinear-Time Algorithm	452
	Notes	455
	Exercises	456
<b>14</b>	<b>Recovery of Random Signals using Deterministic Matrices</b>	459
14.1	Conditioning of Random Submatrices	460
14.2	Sparse Recovery via $\ell_1$ -Minimization	469
	Notes	471
	Exercises	473
<b>15</b>	<b>Algorithms for <math>\ell_1</math>-Minimization</b>	475
15.1	The Homotopy Method	476
15.2	Chambolle and Pock's Primal-Dual Algorithm	481
15.3	Iteratively Reweighted Least Squares	492
	Notes	503
	Exercises	511

<b>Appendix</b> .....	515
<b>A Matrix Analysis</b> .....	515
A.1 Vector and Matrix Norms .....	515
A.2 The Singular Value Decomposition .....	525
A.3 Least Squares Problems .....	531
A.4 Vandermonde Matrices .....	535
A.5 Matrix Functions .....	537
<b>B Convex Analysis</b> .....	543
B.1 Convex Sets .....	543
B.2 Convex Functions .....	545
B.3 The Convex Conjugate .....	549
B.4 The Subdifferential .....	551
B.5 Convex Optimization Problems .....	555
B.6 Matrix Convexity .....	564
<b>C Miscellanea</b> .....	573
C.1 Fourier Analysis .....	573
C.2 Covering Numbers .....	575
C.3 The Gamma Function and Stirling's Formula .....	577
C.4 The Multinomial Theorem .....	580
C.5 Some Elementary Estimates .....	580
C.6 Estimates of Some Integrals .....	581
C.7 Hahn–Banach Theorems .....	583
C.8 Smoothing Lipschitz Functions .....	583
C.9 Weak and Distributional Derivatives .....	585
C.10 Differential Inequalities .....	587
<b>List of Symbols</b> .....	589
<b>References</b> .....	593
<b>Index</b> .....	621

A Mathematical Introduction to Compressive Sensing

Foucart, S.; Rauhut, H.

2013, XVIII, 625 p., Hardcover

ISBN: 978-0-8176-4947-0

A product of Birkhäuser Basel
