1	Quantile Functions	1
1.1	Introduction	1
1.2	Definitions and Properties	3
1.3	Quantile Functions of Life Distributions	9
1.4	Descriptive Quantile Measures	9
1.5	Order Statistics	16
1.6	Moments	20
1.7	Diagrammatic Representations	26
2	Quantile-Based Reliability Concepts	29
2.1	Concepts Based on Distribution Functions	29
2.1.1	Hazard Rate Function	30
2.1.2	Mean Residual Life Function	32
2.1.3	Variance Residual Life Function	36
2.1.4	Percentile Residual Life Function	39
2.2	Reliability Functions in Reversed Time	41
2.2.1	Reversed Hazard Rate	41
2.2.2	Reversed Mean Residual Life	43
2.2.3	Some Other Functions	45
2.3	Hazard Quantile Function	46
2.4	Mean Residual Quantile Function	51
2.5	Residual Variance Quantile Function	54
2.6	Other Quantile Functions	56
3	Quantile Function Models	59
3.1	Introduction	59
3.2	Lambda Distributions	60
3.2.1	Generalized Lambda Distribution	62
3.2.2	Generalized Tukey Lambda Family	75
3.2.3	van Staden–Loots Model	81
3.2.4	Five-Parameter Lambda Family	85
3.3	Power-Pareto Distribution	88

3.4	Govindarajulu's Distribution	93
3.5	Generalized Weibull Family.....	98
3.6	Applications to Lifetime Data.....	100
4	Ageing Concepts	105
4.1	Introduction	105
4.2	Reliability Operations	107
4.2.1	Coherent Systems	107
4.2.2	Convolution.....	108
4.2.3	Mixture.....	108
4.2.4	Shock Models	109
4.2.5	Equilibrium Distributions	110
4.3	Classes Based on Hazard Quantile Function	113
4.3.1	Monotone Hazard Rate Classes.....	113
4.3.2	Increasing Hazard Rate(2)	122
4.3.3	New Better Than Used in Hazard Rate	123
4.3.4	Stochastically Increasing Hazard Rates	125
4.3.5	Increasing Hazard Rate Average.....	126
4.3.6	Decreasing Mean Time to Failure	128
4.4	Classes Based on Residual Quantile Function	130
4.4.1	Decreasing Mean Residual Life Class.....	130
4.4.2	Used Better Than Aged Class.....	134
4.4.3	Decreasing Variance Residual Life	136
4.4.4	Decreasing Percentile Residual Life Functions	139
4.5	Concepts Based on Survival Functions	140
4.5.1	New Better Than Used	140
4.5.2	New Better Than Used in Convex Order	146
4.5.3	New Better Than Used in Expectation	149
4.5.4	Harmonically New Better Than Used	151
4.5.5	\mathcal{L} and \mathcal{M} Classes.....	153
4.5.6	Renewal Ageing Notions.....	154
4.6	Classes Based on Concepts in Reversed Time	156
4.7	Applications.....	158
4.7.1	Analysis of Quantile Functions	158
4.7.2	Relative Ageing	163
5	Total Time on Test Transforms	167
5.1	Introduction	168
5.2	Definitions and Properties	168
5.3	Relationships with Other Curves.....	174
5.4	Characterizations of Ageing Concepts.....	182
5.5	Some Generalizations	185
5.6	Characterizations of Distributions	191
5.7	Some Applications.....	193

6	<i>L</i>-Moments of Residual Life and Partial Moments	199
6.1	Introduction	200
6.2	Definition and Properties of <i>L</i> -Moments of Residual Life	201
6.3	<i>L</i> -Moments of Reversed Residual Life	211
6.4	Characterizations	213
6.5	Ageing Properties	224
6.6	Partial Moments	225
6.7	Some Applications	230
7	Nonmonotone Hazard Quantile Functions	235
7.1	Introduction	236
7.2	Two-Parameter BT and UBT Hazard Functions	236
7.3	Three-Parameter BT and UBT Models	248
7.4	More Flexible Hazard Rate Functions	261
7.5	Some General Methods of Construction	267
7.6	Quantile Function Models	269
7.6.1	Bathtub Hazard Quantile Functions Using Total Time on Test Transforms	269
7.6.2	Models Using Properties of Score Function	273
8	Stochastic Orders in Reliability	281
8.1	Introduction	281
8.2	Usual Stochastic Order	283
8.3	Hazard Rate Order	287
8.4	Mean Residual Life Order	291
8.5	Renewal and Harmonic Renewal Mean Residual Life Orders	298
8.6	Variance Residual Life Order	302
8.7	Percentile Residual Life Order	303
8.8	Stochastic Order by Functions in Reversed Time	306
8.8.1	Reversed Hazard Rate Order	306
8.8.2	Other Orders in Reversed Time	308
8.9	Total Time on Test Transform Order	311
8.10	Stochastic Orders Based on Ageing Criteria	314
8.11	MTTF Order	320
8.12	Some Applications	322
9	Estimation and Modelling	327
9.1	Introduction	327
9.2	Method of Percentiles	328
9.3	Method of Moments	334
9.3.1	Conventional Moments	334
9.3.2	<i>L</i> -Moments	336
9.3.3	Probability Weighted Moments	341
9.4	Method of Maximum Likelihood	344
9.5	Estimation of the Quantile Density Function	346
9.6	Estimation of the Hazard Quantile Function	350

9.7	Estimation of Percentile Residual Life	352
9.8	Modelling Failure Time Data	355
9.9	Model Identification	356
9.10	Model Fitting and Validation	358
