

Contents

Part I Sampling Theory

Unions of Subspaces for Data Modeling and Subspace Clustering	5
Akram Aldroubi	
Fusion Frames and Unbiased Basic Sequences	19
Bernhard G. Bodmann, Peter G. Casazza, Jesse D. Peterson, Ihar Smalyanau, and Janet C. Tremain	
Sampling in Spaces of Bandlimited Functions on Commutative Spaces ...	35
Jens Gerlach Christensen and Gestur Ólafsson	
Smooth Interpolation of Data by Efficient Algorithms	71
C. Fefferman	
An Overview of Time and Multiband Limiting	85
Joseph D. Lakey	
A Panorama of Sampling Theory	107
Kabe Moen, Hrvoje Šikić, Guido Weiss, and Edward Wilson	

Part II Remote Sensing

Multistatic Radar Waveforms for Imaging of Moving Targets	129
Margaret Cheney, Brett Borden, and Ling Wang	
Exploitation Performance and Characterization of a Prototype Compressive Sensing Imaging Spectrometer	151
Christopher J. Deloye, J. Christopher Flake, David Kittle, Edward H. Bosch, Robert S. Rand, and David J. Brady	
An Introduction to Hyperspectral Image Data Modeling	173
David B. Gillis and Jeffrey H. Bowles	

Hyperspectral Demixing: Sparse Recovery of Highly Correlated Endmembers	195
John B. Greer	
Theory of Passive Synthetic Aperture Imaging	211
Ling Wang, Can Evren Yarman, and Birsen Yazıcı	
Part III Mathematics of Data Processing	
Golay–Rudin–Shapiro Polynomials and Phased Arrays	239
George Benke	
Multi-Resolution Geometric Analysis for Data in High Dimensions	259
Guangliang Chen, Anna V. Little, and Mauro Maggioni	
On the Fourth-Order Structure Function of a Fractal Process	287
Carol T. Christou and Garry M. Jacyna	
Harmonic Analysis of Databases and Matrices	297
Ronald R. Coifman and Matan Gavish	
The Structure of Sidelobe-Preserving Operator Groups	311
Gregory E. Coxson	
Zeros of Some Self-Reciprocal Polynomials	329
David Joyner	
Part IV Applications of Data Processing	
Generalized Mutual Interdependence Analysis of Noisy Channels	353
Heiko Claussen, Justinian Rosca, Viswanathan Ramasubramanian, and Subramani Thiyagarajan	
Approximation Methods for the Recovery of Shapes and Images from Gradients	377
Vishal M. Patel and Rama Chellappa	
FM Perturbations due to Near-Identity Linear Systems	399
Anthony Teolis	
Eddy Current Sensor Signal Processing for Stall Detection	433
Carole Teolis, David Gent, Christine Kim, Anthony Teolis, James Paduano, and Michelle Bright	
State-Dependent Channels: Strong Converse and Bounds on Reliability Function	461
Himanshu Tyagi and Prakash Narayan	
Index	479

Excursions in Harmonic Analysis, Volume 1

The February Fourier Talks at the Norbert Wiener
Center

Andrews, T.D.; Balan, R.; Benedetto, J.J.; Czaja, W.;
Okoudjou, K. (Eds.)

2013, XVIII, 488 p. 135 illus., 88 illus. in color.,

Hardcover

ISBN: 978-0-8176-8375-7

A product of Birkhäuser Basel
