

Contents

Stability of Difference Schemes	1
Peter D. Lax	
Mathematical Intuition: Poincaré, Pólya, Dewey	9
Reuben Hersh	
Three-Dimensional Plasma Arc Simulation Using Resistive MHD	31
Rolf Jeltsch and Harish Kumar	
Space-Time Hybridizable Discontinuous Galerkin Method for the Advection–Diffusion Equation on Moving and Deforming Meshes	45
Sander Rhebergen and Bernardo Cockburn	
A Numerical Algorithm for Ambrosetti–Prodi Type Operators	65
José Teixeira, Cal Neto, and Carlos Tomei	
On the Quadratic Finite Element Approximation of 1D Waves: Propagation, Observation, Control, and Numerical Implementation	75
Aurora Marica and Enrique Zuazua	
Space-Time Adaptive Multiresolution Techniques for Compressible Euler Equations	101
Margarete O. Domingues, Sônia M. Gomes, Olivier Roussel, and Kai Schneider	
A Framework for Late-Time/Stiff Relaxation Asymptotics	119
Philippe G. LeFloch	
Is the CFL Condition Sufficient? Some Remarks	139
Kai Schneider, Dmitry Kolomenskiy, and Erwan Deriaz	
Fast Chaotic Artificial Time Integration	147
Uri Ascher and Kees van den Doel	

Appendix A	Hans Lewy's Recovered String Trio	157
	Played by Lori Courant Lax, viola, Dorothy Strahl, violin, and Carol Buck, cello	
Appendix B	Reprint of CFL Original Paper	161
Appendix C	Reprint of CFL Original Paper (English Translation) . . .	207
Appendix D	Event Schedule and List of Supporters, Organizers, Lecturers, and Attendees	229

The Courant-Friedrichs-Lewy (CFL) Condition

80 Years After Its Discovery

de Moura, C.A.; Kubrusly, C. (Eds.)

2013, XII, 237 p. 118 illus., 40 illus. in color., Hardcover

ISBN: 978-0-8176-8393-1

A product of Birkhäuser Basel
