

Contents

Part I Natural History and Genetic Diversity

1	Phylogenetic Relationships of Saccharinae and Sorghinae.....	3
	Elizabeth A. Kellogg	
2	The Gene Pool of <i>Sorghum bicolor</i> and Its Improvement	23
	Clarissa T. Kimber, Jeff A. Dahlberg, and Stephen Kresovich	
3	The Gene Pool of <i>Saccharum</i> Species and Their Improvement	43
	Andrew H. Paterson, Paul H. Moore, and Tom L. Tew	
4	The Gene Pool of <i>Miscanthus</i> Species and Its Improvement	73
	Erik J. Sacks, John A. Juvik, Qi Lin, J. Ryan Stewart, and Toshihiko Yamada	

Part II Genomic Tools, Resources and Approaches

5	The Sorghum Genome Sequence: A Core Resource for Saccharinae Genomics.....	105
	Andrew H. Paterson	
6	Transcriptome Analysis in the Saccharinae	121
	Milton Yutaka Nishiyama-Jr, Fabio Vicente, Paloma Mieko Sato, Savio Siqueira Ferreira, Frank Alex Feltus, and Glaucia Mendes Souza	
7	Sorghum and Sugarcane Proteomics	141
	Bongani Kaiser Ndimba and Rudo Ngara	

8 Gene Mutagenesis Systems and Resources for the <i>Saccharinae</i>	169
Zhanguo Xin, Ming-Li Wang, Surinder Chopra, and Pohao Wang	
9 Association Genetics Strategies and Resources	187
Jianming Yu, Martha T. Hamblin, and Mitchell R. Tuinstra	
10 Sorghum Transformation: Overview and Utility	205
Tejinder Kumar, Arlene Howe, Shirley Sato, Ismail Dweikat, and Tom Clemente	
11 Genetic Engineering of <i>Saccharum</i>	223
Getu Beyene, Ian S. Curtis, Mona B. Damaj, Marco T. Buenrostro-Nava, and T. Erik Mirkov	
12 Genetic Engineering of <i>Miscanthus</i>	255
Dean Engler and Katrin Jakob	
13 <i>Saccharinae</i> Bioinformatics Resources	303
Alan R. Gingle and F. Alex Feltus	
 Part III Bridging Classical and Genomic Investigations of Sorghum Biology	
14 Bridging Classical and Molecular Genetics of Sorghum Plant Stature and Maturity	333
Patrick J. Brown and Andrew H. Paterson	
15 Bridging Classical and Molecular Genetics of Sorghum Disease Resistance	347
Clint W. Magill	
16 Bridging Conventional and Molecular Genetics of Sorghum Insect Resistance	367
Yinghua Huang, Hari C. Sharma, and Mukesh K. Dhillon	
17 Genetic Enhancement of Sorghum for Biomass Utilization	391
Wilfred Vermerris and Ana Saballos	
 Part IV Early Messages pertinent to Other Crops, from <i>Saccharinae</i> Research	
18 Comparative Genomics of Grasses: A <i>Saccharinae</i>-Centric View	429
Andrew H. Paterson, Xiyin Wang, Haibao Tang, and Changsoo Kim	

19	Comparative Genomic Analysis of C4 Photosynthesis Pathway Evolution in Grasses	447
	Xiyin Wang and Andrew H. Paterson	
20	Differentiation of Seed, Sugar, and Biomass-Producing Genotypes in <i>Saccharinae</i> Species	479
	Seth C. Murray	
21	Perennialism and Weediness in the <i>Saccharinae</i>.....	503
	Russell W. Jessup	
 Part V Synthetic and Futuristic Perspectives		
22	Bringing the Benefits of Sorghum Genomics to Africa	519
	Segenet Kelemu, Brhane Gebrekidan, and Jagger Harvey	
23	Synthesis: Fundamental Insights and Practical Applications from the <i>Saccharinae</i> Clade	541
	Andrew H. Paterson	
	Index.....	551

Genomics of the Saccharinae

Paterson, A. (Ed.)

2013, XVI, 568 p., Hardcover

ISBN: 978-1-4419-5946-1
