

Contents

1	What is a Radio?	1
2	What Is a Software-Defined Radio?	5
3	Why SDR?	9
3.1	Adaptive Coding and Modulation	10
3.1.1	ACM Implementation Considerations	16
3.2	Dynamic Bandwidth and Resource Allocation	17
3.3	Hierarchical Cellular Network	19
3.4	Cognitive Radio	20
3.5	Green Radio	25
3.6	When Things go Really Wrong	26
3.6.1	Unexpected Channel Conditions	27
3.6.2	Hardware Failure	27
3.6.3	Unexpected Interference	28
3.7	ACM Case Study	29
3.7.1	Radio and Link Emulation	30
3.7.2	Cross-Layer Error Mitigation	32
4	Disadvantages of SDR.	37
4.1	Cost and Power	37
4.2	Complexity	38
4.3	Limited Scope	40
5	Signal Processing Devices	43
5.1	General Purpose Processors	43
5.2	Digital Signal Processors	44
5.3	Field Programmable Gate Arrays	44

5.4	Specialized Processing Units	47
5.4.1	Tilera Tile Processor.	49
5.5	Application-Specific Integrated Circuits	51
5.6	Hybrid Solutions	51
5.7	Choosing a DSP Solution	52
6	Signal Processing Architectures.	55
6.1	GPP-Based SDR.	55
6.1.1	Nonrealtime Radios	58
6.1.2	High-Throughput GPP-Based SDR	60
6.2	FPGA-Based SDR	60
6.2.1	Separate Configurations.	61
6.2.2	Multi-Waveform Configuration	61
6.2.3	Partial Reconfiguration	62
6.3	Host Interface	68
6.3.1	Memory-Mapped Interface to Hardware	69
6.3.2	Packet Interface	73
6.4	Architecture for FPGA-Based SDR.	73
6.4.1	Configuration.	73
6.4.2	Data Flow	75
6.4.3	Advanced Bus Architectures	78
6.4.4	Parallelizing for Higher Throughput	80
6.5	Hybrid and Multi-FPGA Architectures	81
6.6	Hardware Acceleration	83
6.6.1	Software Considerations	84
6.6.2	Multiple HA and Resource Sharing	89
6.7	Multi-Channel SDR	92
7	SDR Standardization	97
7.1	Software Communications Architecture and JTRS	97
7.1.1	SCA Background	98
7.1.2	Controlling the Waveform in SCA	103
7.1.3	SCA APIs	104
7.2	STRS	107
7.3	Physical Layer Description	109
7.3.1	Use Cases	111
7.3.2	Development Approach.	111
7.3.3	A Configuration Fragment.	113
7.3.4	Configuration and Reporting XML	115
7.3.5	Interpreters for Hardware-Centric Radios.	116
7.3.6	Interpreters for Software-Centric Radios	116
7.3.7	Example	118

7.4	Data Formats	118
7.4.1	VITA Radio Transport (VITA 49, VRT)	118
7.4.2	Digital RF (digRF)	125
7.4.3	SDDS	125
7.4.4	Open Base Station Architecture Initiative	127
7.4.5	Common Public Radio Interface	128
8	Software-Centric SDR Platforms	131
8.1	GNURadio	131
8.1.1	Signal Processing Blocks	132
8.1.2	Scheduler	135
8.1.3	Basic GR Development Flow	136
8.1.4	Case Study: Low Cost Receiver for Weather Satellites	137
8.2	Open-Source SCA Implementation: Embedded	140
8.3	Other All-Software Radio Frameworks	143
8.3.1	Microsoft Research Software Radio (Sora)	143
8.4	Front End for Software Radio	144
8.4.1	Sound-Card Front Ends	145
8.4.2	Universal Software Radio Peripheral	145
8.4.3	SDR Front Ends for Navigation Applications	149
8.4.4	Network-Based Front Ends	149
9	Radio Frequency Front End Architectures	151
9.1	Transmitter RF Architectures	151
9.1.1	Direct RF Synthesis	152
9.1.2	Zero-IF Upconversion	154
9.1.3	Direct-IF Upconversion	155
9.1.4	Super Heterodyne Upconversion	157
9.2	Receiver RF Front End Architectures	157
9.2.1	Six-Port Microwave Networks	158
10	State-of-the-Art SDR Components	159
10.1	SDR Using Test Equipment	159
10.1.1	Transmitter	160
10.1.2	Receiver	161
10.1.3	Practical Considerations	163
10.2	SDR Using COTS Components	165
10.2.1	Highly Integrated Solutions	165
10.2.2	Non-Integrated Solutions	166
10.2.3	Analog-to-Digital Converters (ADCs)	167
10.2.4	Digital to Analog Converters (DACs)	171

- 10.3 Exotic SDR Components 171
- 10.4 Tunable Filters 173
- 10.5 Flexible Antennas 178
- 11 Development Tools and Flows 183**
 - 11.1 Requirements Capture 183
 - 11.2 System Simulation 186
 - 11.3 Firmware Development 188
 - 11.3.1 Electronic System Level Design 188
 - 11.3.2 Block-Based System Design 190
 - 11.3.3 Final Implementation 192
 - 11.4 Software Development 193
 - 11.4.1 Real-Time Versus Non-Real-Time Software 193
 - 11.4.2 Optimization 195
 - 11.4.3 Automatic Code Generation 196
- 12 Conclusion 199**
- Appendix A: An Introduction to Communications Theory 201**
- Appendix B: Recommended Test Equipment 243**
- Appendix C: Sample XML Files for an SCA Radio 245**
- Bibliography 253**
- Index 265**
