

# Contents

<b>1</b>	<b>Introduction</b>	1
1.1	Belief Revision	2
1.2	Belief Sets and Belief Bases	3
1.3	Postulates and Constructions	3
1.4	Non-Classical Logics	4
1.5	Belief Revision in Non-Classical Logics	5
1.6	Organization of the Book	5
	References	6
<b>2</b>	<b>Consequence</b>	7
2.1	Tarskian Consequence Operator	8
2.2	Consequence Relation	10
2.2.1	Properties of the Consequence Operator	10
2.3	Standard Languages	14
2.4	Conclusion	17
	References	17
<b>3</b>	<b>Logics</b>	19
3.1	Classical Propositional Logic	20
3.1.1	Language	20
3.1.2	Semantic	20
3.1.3	Axiomatic System	21
3.1.4	Properties	25
3.2	Intuitionistic Logic	26
3.2.1	Semantics	26
3.2.2	Axiomatic System	27
3.2.3	Properties	29
3.3	Horn Logic (Horn)	30
3.3.1	Properties	31

3.4	Description Logics. . . . .	32
3.4.1	Language . . . . .	33
3.4.2	Semantics. . . . .	34
3.4.3	Extensions of $\mathcal{ALC}$ . . . . .	35
3.4.4	OWL. . . . .	37
3.4.5	Properties. . . . .	38
3.5	Conclusion . . . . .	42
	References . . . . .	43
<b>4</b>	<b>Classical Belief Revision. . . . .</b>	<b>45</b>
4.1	Belief Systems . . . . .	45
4.2	AGM Theory . . . . .	47
4.2.1	AGM Contraction . . . . .	48
4.2.2	AGM Revision . . . . .	53
4.3	Belief Base Theory . . . . .	56
4.3.1	Base Contraction. . . . .	57
4.3.2	Belief Base Revision. . . . .	62
4.3.3	Belief Base Semi-Revision. . . . .	66
4.4	Conclusion . . . . .	69
	References . . . . .	70
<b>5</b>	<b>AGM Contraction in Non-Classical Logics . . . . .</b>	<b>71</b>
5.1	Generalized AGM Postulates . . . . .	72
5.2	AGM Compliance . . . . .	73
5.3	Relevance Compliance. . . . .	75
5.4	Relevance and Partial Meet Contraction. . . . .	76
5.5	Rationality . . . . .	79
5.6	Conclusion . . . . .	81
	References . . . . .	82
<b>6</b>	<b>AGM Revision in Logics Without Negation. . . . .</b>	<b>83</b>
6.1	Generalized Postulates . . . . .	84
6.2	Construction . . . . .	84
6.3	Representation Theorems . . . . .	86
6.4	Conclusion . . . . .	89
	References . . . . .	89
<b>7</b>	<b>Base Revision in Logics Without Negation . . . . .</b>	<b>91</b>
7.1	External Revision Without Negation . . . . .	92
7.1.1	External Kernel Revision With Strong Success. . . . .	93
7.1.2	External Kernel Revision with Strong Consistency . . . . .	95
7.1.3	External Partial Meet Revision with Strong Success . . . . .	96

7.1.4	External Partial Meet Revision with Strong Consistency . . . . .	98
7.2	Internal Revision Without Negation. . . . .	99
7.2.1	Internal Partial Meet Revision . . . . .	100
7.2.2	Internal Kernel Revision . . . . .	101
7.3	Conclusion . . . . .	103
	References . . . . .	104
<b>8</b>	<b>Algorithms for Belief Bases . . . . .</b>	<b>105</b>
8.1	Computing One $\alpha$ -Kernel . . . . .	105
8.2	Minimal Cuts . . . . .	107
8.3	Computing the Kernel . . . . .	108
8.4	Computing the Remainder Set. . . . .	109
8.5	Kernel and Remainder Sets. . . . .	110
8.6	Conclusion . . . . .	112
	References . . . . .	113
<b>9</b>	<b>Conclusion. . . . .</b>	<b>115</b>
	References . . . . .	117
	<b>Index . . . . .</b>	<b>119</b>
