

Contents

Part I Process System

1 Energy Saving Technology	3
Yasuki Kansha	
1.1 Pinch Technology	3
1.2 Self-Heat Recuperation Technology	5
1.2.1 Process Design Methodology	6
1.2.2 Design Methodology for Separation Process	10
1.2.3 Summary	13
1.3 Conclusion	13
References	13

Part II Application of Self-Heat Recuperation Technology

2 Reaction Section	17
Kazuo Matsuda	
2.1 Introduction	17
2.2 Process Flow Description	18
2.3 Applying Self-Heat Recuperation Technology	18
2.4 Prospect of Applying Self-Heat Recuperation Technology	19
2.5 Mass and Heat Balance Calculation	20
2.5.1 Conventional Case	20
2.5.2 Proposed Case	21
2.6 Discussion	22
2.7 Conclusion	24
References	24

3 Distillation Section	27
Kazuo Matsuda and Yasuki Kansha	
3.1 Introduction	27
3.2 Process Flow Description	28
3.3 Study Basis	29
3.4 Applying Self-Heat Recuperation Technology	29
3.5 Prospect of Applying Self-Heat Recuperation Technology	29
3.6 Mass and Heat Balance Calculation	31
3.6.1 Conventional Case	31
3.6.2 Proposed Case	32
3.7 Discussion	32
3.8 Conclusion	34
References	35
4 Drying Section	37
Chihiro Fushimi	
4.1 Introduction	37
4.2 Basic Concept of Drying Based on Self-Heat Recuperation Technology	38
4.3 Drying Process	39
4.4 Mass and Heat Balance Calculation of the Proposed Drying Process	40
4.5 Primary Energy Consumption and CO ₂ Emission	45
4.6 Conclusion	46
References	47
5 Gas Separation Section	49
Akira Kishimoto	
5.1 Introduction	49
5.2 Cryogenic Air Separation (Distillation)	50
5.2.1 Conventional Cryogenic Air Separation Process	50
5.2.2 Proposed Cryogenic Air Separation Process	51
5.2.3 Mass and Heat Balance Calculation	52
5.3 CO ₂ Absorption Process	54
5.3.1 Conventional CO ₂ Absorption Process	55
5.3.2 Proposed CO ₂ Absorption Process	56
5.3.3 Mass and Heat Balance Calculation	57
5.4 Conclusion	59
References	59

Part III Utility System

6 Utility System	63
Kazuo Matsuda	
6.1 Introduction	63
6.2 Area-Wide Pinch Technology	64
6.2.1 Total Site Profile Analysis	64
6.2.2 R-curve Analysis	65
6.2.3 Work Procedure	67
6.3 Application of Area-Wide Pinch Technology	67
6.3.1 Mizushima and Chiba Industrial Areas	68
6.3.2 Results.	68
6.4 Area-Wide Integration Projects for Energy Saving.	70
6.4.1 Energy Sharing System	70
6.4.2 Heat Sharing System	72
6.4.3 Low Heat Power Generation System	72
6.5 Discussion	73
References	75

Advanced Energy Saving and its Applications in Industry

Matsuda, K.; Kansha, Y.; Fushimi, C.; Tsutsumi, A.;

Kishimoto, A.

2013, XI, 75 p. 35 illus., Softcover

ISBN: 978-1-4471-4206-5
