

# Preface

This book is mainly an introduction to the principles of Orthopedics, which is written by different Orthopedic Surgeons, who have specialized in the subjects they have written in. This volume details various Orthopedic conditions (other than trauma) by regions in the upper and lower limb.

I was an undergraduate and post-graduate teacher at the University of Liverpool, UK, and the University of London, UK, for the undergraduates and for the final FRCS candidates. On returning home to Bangalore, India, I was an undergraduate teacher at St. John's Hospital, Bangalore, India, and at M.S. Ramaiah Medical Teaching Hospital, Bangalore, India, and I am indebted to all my students for their constant desire to master Orthopedics at their young age. Above all, I would like to thank all my teachers who did not spare any effort to discuss with me topics of Orthopedic interest, both in the lecture hall and in their spare time.

I am deeply indebted to my dear friend, Mr. Magdi E. Greiss, M.D., M.Ch. (Orth), FRCS, Senior Consultant Orthopedic Surgeon North Cumbria University Hospitals, UK, Former President, BOFAS, UK, for his timely help in specially preparing the snaps that have been used in this book, despite him being extremely busy in setting up of a foot and ankle clinic for the World Orthopaedic Concern in developing countries.

I would express my sincere thanks to Mr. Adhish Avasthi, M.B.B.S., M.S. Orth., MRCS Registrar Orthopedics and Mr. Richard Hill, M.B. Ch.B., FRCS Ed, FRCS (Tr & Orth) Ed, Consultant Orthopedic Surgeon, Department of Trauma & Orthopedics, St Richard's Hospital, Chichester PO19 6SE, West Sussex, UK, for his comprehensive description on Common Sports Injuries, which is a subspeciality in vogue at the moment. I would also like to thank Dr. Suhas Namjoshi, Consultant Radiologist, Hillingdon Hospital, London, UK, M.B.B.S. (Bom), DMRE (BOM), DMRE(Liverpool), FRCR (UK), for his unique chapter on 'Role of Radiology and Imaging in Orthopedics', which is written up to give students an idea of the importance of Radiology and Imaging in Orthopedics. I would thank Dr. Geethan I, M.S. Orth., DNB (Orth), Orthopedic Surgeon, Fellow, Ortho One, Speciality Hospital, Coimbatore, India, and Dr. David V. Rajan, M.S. Orth., MNAMS, FRCS (G) Consultant Orthopedic Surgeon, Director, Ortho One, Coimbatore, India, and Past

President of the Indian Arthroscopy Society for their timely help on the chapter on 'Arthroscopy of the Knee Joint', which was specially written up for this book.

I would like to thank Sharad Goyal, D.Orth. (Gold Med), M.S. Orth., DNB Orth, M.Ch. Orth. (Liv), Orthopedic Surgeon, Department of Trauma & Orthopedics, St Richard's Hospital, Chichester PO19 6SE, West Sussex, UK for his active interest and help in completing my book.

Finally, I would like to thank Dr. Robert H. Cofield, M.D., Emeritus Chairman, Department of Orthopedic Surgery, Mayo Clinic, Professor of Orthopedics, Mayo Clinic College of Medicine, Rochester, MN, for his ever encouraging foreword for this book of mine.

I would like to express my sincere thanks to Springer-Verlag for their kind permission to allow me to reproduce 35 snaps of my book entitled *Clinical Examination in Orthopedics* (Springer) for this book of mine.

Above all I would like to thank Mr. Steffan D. Clements, Editor, Clinical Medicine, Springer (London) for his untiring guidance in the preparation of this book.

I would like to express my sincere gratitude and thanks to all the Orthopedic Surgeons for their valuable contribution in their subspecialities. This textbook is mainly valuable and a must for the beginner who faces Orthopedics as he encounters in daily life, and, when combined with my book entitled *Clinical Examination in Orthopedics* (Springer), would make him complete in all aspects of Orthopedics, both clinical and theoretical.

I am very grateful to my son who has helped me in the tables, corrections, diagrams, charts and formatting of this book and its presentation.

(Dr. K. Mohan Iyer)
