

Contents

1	Introduction to Internal Combustion Engines	1
1.1	Basic concepts of Internal Combustion Engines	1
1.1.1	Operation of Reciprocating Engines	3
1.1.2	Main Engine Operating Parameters	6
1.2	Outline of the different types of reciprocating engines	8
1.2.1	PFI-SI Engines	8
1.2.2	GDI-SI Engines	9
1.2.3	Diesel Engines	10
1.2.4	HCCI Engines	12
1.3	Engine Management System	12
	References	15
2	Basic Concepts on GDI Systems	17
2.1	Mixture Preparation: Gasoline Port Fuel Injection Versus Direct Injection	18
2.2	GDI Combustion Systems	19
2.2.1	Spray Guided Systems	22
2.2.2	Wall Guided Systems	23
2.2.3	Air Guided Systems	26
2.3	Requirements of a GDI System	28
2.4	Description of the Common Rail Injection System	30
2.4.1	High Pressure Mechanical Pump	32
	References	32
3	A Control Oriented Model of a Common Rail System	35
3.1	Mathematical Model	35
3.1.1	Electrovalve for the Pressure Regulation	36
3.1.2	Actuation Circuit	37
3.1.3	Fuel Pressure	40

3.2	Model Validation Results	43
3.3	GDI Injectors Model	43
3.4	Qualitative Analysis of Plant Disturbances	47
3.4.1	Battery Voltage and HP Pump Speed	47
3.4.2	Pressure Ripple.	50
	References	55
4	Synthesis and Experimental Validation of a Fuel Injection	
	Pressure Controller in a Common Rail System	57
4.1	Introduction	57
4.2	Controller Design	58
4.2.1	Feedforward Control Action	59
4.2.2	Feedback Control Action	60
4.3	Injection Time Management	61
4.4	Experimental Control Setup	63
4.5	Experimental Control Results	64
4.5.1	Steady-State Analysis	65
4.5.2	Rise Time Analysis	66
4.5.3	Tracking Performance	71
	References	78
	About the Authors.	79
	Index	81

Common Rail System for GDI Engines

Modelling, Identification, and Control

Fiengo, G.; di Gaeta, A.; Palladino, A.; Giglio, V.

2013, VIII, 81 p. 58 illus., 38 illus. in color., Softcover

ISBN: 978-1-4471-4467-0
