

Contents

1 Casting, Moulding and Forming

1-1	Process capability study of hybrid investment casting	
R. Singh...		3
1-2	Enhancing the performance of laboratory centrifuges with carbon fiber rotors	
U. Klaeger and V. Galazky		7
1-3	Composite grid cylinder vs. composite tube: Comparison based on compression test, torsion test and bending test	
C. L. Lai, C. Liu and J. B. Wang.....		11
1-4	Thermal laser micro-adjustment using ultra-short pulses	
J. Griffiths, S. P. Edwardson, G. Dearden and K. G. Watkins		15
1-5	Precision mould manufacturing for polymer optics	
M. Speich, R. Börret, A. K. M. DeSilva and D. K. Harrison		21
1-6	Gradient vector method for computing feed-paths and hot-spots during casting solidification	
M. Sutaria and B. Ravi.....		25
1-7	Effect of casting orientation, thickness and composition on solidification structure and properties of ductile iron castings	
V. D. Shinde, B. Ravi and K. Narasimhan.....		29
1-8	Laser beam shaping for manufacturing processes	
D. Hand		33

2 Computer Aided Engineering

2-1	A Haptic approach to computer aided process planning	
C. A. Fletcher, J. M. Ritchie and T.Lim.....		37
2-2	Integrated tactile-optical coordinate system for the reverse engineering of complex geometry	
F. Li, A. P. Longstaff, S. Fletcher and A. Myers		41
2-3	Adapting STEP-NC programs for interoperability between different CNC technologies	
M. Safaieh, A. Nassehi and S. T. Newman.....		45
2-4	A heuristic approach for nesting of 2D shapes	
G. Savio, R. Meneghello and G. Concheri.....		49
2-5	STEP-NC compliant manufacturing cost estimation system for CNC milled part component	
A. O. Deboode, A. Nassehi, L. B. Newnes and S. T. Newman		53
2-6	Automated design and STEP-NC machining of impellers	
A. Anbalagan, N. K. Mehta and P. K. Jain		57
2-7	LACAM3D, CAM solution for tool path generation for build up of complex aerospace components by laser powder deposition	
J. Flemmer, N. Pirch, J. Witzel, A. Gasser, K. Wissenbach and I. Kelbassa		61

3 ECM and EDM

3-1	A comparative study of the ANN and RSM models for predicting process parameters during WEDC of SiCp/6061 Al MMC P. Shandilya, P. K. Jain and N. K. Jain	67
3-2	Improved surface properties of EDM components after irradiation by pulsed electrons J. Murray and A. T. Clare	71
3-3	Modeling and experimental study of electrical discharge diamond cut-off grinding (EDDCG) of cemented carbide S. K. S. Yadav and V. Yadava	75
3-4	Experimental investigation on material removal rate in wire electrical discharge turning process for Al/SiCp metal matrix composite M. Rajkumar, M. Kanthababu and S. Gowri	79
3-5	Study on electrolyte jet machining of cemented carbide K. Mizugai, N. Shibuya and M. Kunieda.....	83
3-6	The material removal rate increases during machining of the steel St 37 (DIN 17100) in the electrical discharge machining process S. Santos, A. Gomes and J. D. Marafona	87

4 Machine Tools

4-1	Idealising mesh modelling for haptic enabled services and operands E. Valladares, H. I. Medellin, C. Fletcher, T. Lim, J. Ritchie, X. T. Yan, V. Arnez and E. Hernandez	93
4-2	Analysis of dynamic properties of a multi-stage gear system using the flexible multi-body system modelling technique M. Sulitka, Z. Neusser and J. Veselý	97
4-3	An efficient offline method for determining the thermally sensitive points of a machine tool structure N.S. Mian, S. Fletcher, A. P. Longstaff and A. Myers.....	101
4-4	Development of an Abbé error compensator for NC machine tools K. C. Fan, T. H. Wang, C. H. Wang and H. M. Chen.....	105
4-5	A novel haptic model and environment for maxillofacial surgical operation planning and manipulation X-T. Yan, E. Hernandez, V. Arnez, E. Govea, T. Lim, Y. Li, J. Corney and V. Villela.....	109
4-6	“LCA to go” – Environmental assessment of machine tools according to requirements of Small and Medium-sized Enterprises (SMEs) – development of the methodological concept R. Pamminger, D. I. S. Gottschall and W. Wimmer	113
4-7	Analytical modeling of the machine tool spindle dynamics under operational conditions O. Özşahin, E. Budak and H. N. Özgüven	117

5 Machining

5-1	Optimization of cutting parameters for drilling Nickel-based alloys using statistical experimental design techniques L. J. Zhang, T. Wagner and D. Biermann	123
5-2	Machining performance of a graphitic SiC-Aluminium matrix composite V. Songmene, R. D. Njoya and B. T. Nkengue.....	127
5-3	Surface integrity of Al6061-T6 drilled in wet, semi-wet and dry conditions Y. Zedan, V. Songmene, R. Khettabi, J. Kouam and J. Masounave	131
5-4	Dry machining of aluminum alloys and air quality A. Djebara and V. Songmene.....	135
5-5	Study on hybrid magnetic force assistant abrasive flow machining process R. Singh and R. S. Walia	141
5-6	The effect of in-plane exit angle on burr minimization in face milling of medium carbon steels in dry environment P. P. Saha, A. Das and S. Das	145
5-7	A surface generation model for micro cutting processes with geometrically defined cutting edges J. Vehmeyer, I. P. Kurczewski and S. Twardy.....	149
5-8	An investigation into abrasive water jet machining of TRIP sheet steels using Taguchi technique and regression models J. Kechagias, I. Ntziantzias, N. Fountas and N. M. Vaxevanidis	153
5-9	SelecTool: Software tool for the search and comparison of cutting tools depending on standard, geometric and cutting properties and user's criteria J. A. Montes, J. M. Canela and J. V. Calvet.....	157
5-10	Computational fluid dynamics analysis for predicting the droplet size in MQL during grinding of super-alloy A. S. Balan, L. Vijayaraghavan and R. Krishnamurthy	161
5-11	Cryogenic CNC machining of individualised packaging V. G. Dhokia, A. Nassehi, S. A. Wolf and S. T. Newman.....	165
5-12	Modeling and simulation of shot peening process X. J. Zhang, J. B. Wang, A. Levers and K. K. B. Hon.....	169
5-13	Evaluation of tool performance and hole quality when drilling C355 aluminium alloy using diamond coated and PCD drills R. Rattanakit, S. L. Soo, D. K. Aspinwall, B. Haffner, Z. Zhang, D. Arnold and P. Harden.....	173
5-14	Real-time monitoring, control and optimization of CO ₂ laser cutting of mild steel plates E. F. Sichani, J. Keuster, J.-P. Kruth and J. R. Duflou	177
5-15	The stress-strained state of ceramic tools with coating S. Grigoriev, V. Kuzin, D. Burton and A. D. Batako.	181
5-16	Vibration assisted surface grinding of mild and hardened steel: Performance of a novel vibrating jig design V. Tsiakoumis and A. D. Batako	185

5-17	Investigation on the effect of cutting parameters on heat partition into multilayer coated tools in HSM M. Fahad, P. T. Mativenga and M. A. Sheikh	189
5-18	Effect of key process variables on effectiveness of minimum quantity lubrication in high speed machining I. H. Mulyadi and P. T. Mativenga	193
5-19	Development of a free-machining ($\alpha+\beta$) Titanium alloy based on Ti 6Al 2Sn 4Zr 6Mo M. S. Hussain, C. Siemers and J. Rösler	197
5-20	An improved setup for precision polishing of metallic materials using ice bonded abrasive tool M. Boopalan, G. Venkatarathnam and R. Babu	201
5-21	Experimental investigation and FEA simulation of drilling of Inconel 718 alloy M. S. Sureshkumar, D. Lakshmanan and A. Murugarajan	205
5-22	Performance evaluation of bandsaw using scientific method when cutting tool steels M. Sarwar, J. Haider, M. Persson and H. Hellbergh	209

6 Manufacturing Systems Management and Automation

6-1	Development of a robust handling model for foundry automation R. S. Wadhwa	215
6-2	Concise process improvement - A process variation diagnosis tool S. Cox, J. A. Garside and A. Kotsialos	223
6-3	An evaluation of physics engines and their application in haptic virtual assembly environments G. González-Badillo, H. I. Medellín-Castillo, C. Fletcher, T. Lim, J. Ritchie and S. Garbaya	227
6-4	Effect of weight perception on human performance in a haptic-enabled virtual assembly platform G. González-Badillo, H. I. Medellín-Castillo, H. Yu, T. Lim, J. Ritchie and S. Garbaya	231
6-5	Impact of workers with different task times on the performance of an asynchronous assembly line R. Folgado, E. Henriques and P. Peças	235
6-6	An integrated data model for quality information exchange in manufacturing systems Y. Zhao, T. Kramer, W. Rippey, J. Horst and F. Proctor	239
6-7	Bayesian network modeling of machine breakdowns E. M. Abogrean and M. Latif	243
6-8	Exposing human behaviour to patient flow modeling E. K. Aboukanda and M. Latif	247
6-9	A new simulation-based approach to production planning and control G. Kulcsár, P. Bikfalvi, F. Erdélyi and T. Tóth	251
6-10	Complexity in manufacturing supply chain applied to automotive industry: Modelling, analysis and a case study K. Katchasuwanmanee and K. Cheng	255

7 Metrology

7-1	Dynamic measurement on structures using tracking-interferometers R. Schmitt and M. Harding	269
7-2	Model for a CAD-assisted designing process with focus on the definition of the surface texture specifications and quality Q. Qi, X. Jiang, P. J. Scott and W. Lu.....	273
7-3	A generalised featured-based inspection framework for dimensional inspection of individual machined parts L. Ali, M. Khan, K. Alam, S. H. Imran and M. N. Anwar	277
7-4	Practical in-situ calibration method for the non-linear output from a low cost eddy current sensor D. Clough, S. Fletcher, A. P. Longstaff and P. Willoughby	281
7-5	Information required for dimensional measurement J. Horst, C. Brown, K. Summerhays, R. Brown, L. Maggiano and T. Kramer	285

8 Rapid Prototyping

8-1	Material switching system for multi-material bio-structure in projection micro-Stereolithography K. W. Jo, I. B. Park , Y. M. Ha and S. H. Lee	291
8-2	Turbine blade manufacturing through Rapid Tooling (RT) process and its quality inspection A. Iftikhar, M. Khan, K. Alam, A. Nisar, S. H. Imran and Y. Ayaz	295
8-3	Mechanical characterization of polyamide porous specimens for the evaluation of emptying strategies in Rapid Prototyping A. Cerardi, M. Caneri, R. Meneghello and G. Concheri	299

9 Welding

9-1	Increasing the tolerance to fit-up gap using hybrid laser-arc welding and adaptive control of welding parameters C. M. Allen, P. A. Hilton and J. Blackburn	305
9-2	Characteristics of microstructures in laser spot welds of a sintered NdFeB permanent magnet under different welding modes C. Yi, B. Chang, C. Zhang, D. Du, H. Zhang and Y. Li	309
9-3	Study on full penetration stability of light alloys sheet laser welding L. Chen, S. L. Gong and J. Yang	315
9-4	Challenges of investigating distortion effects in laser micro welding P. Woizeschke and F. Vollertsen	319
9-5	Characteristics of YAG-MIG hybrid welding 6061 Aluminum alloy with different states F. Xu, L. Chen, S. L. Gong, Y. F. Guo and L. Y. Guo	323
9-6	Pulsed laser welding of thin Hastelloy C-276: High-temperature mechanical properties and microstructure D. J. Wu, G. Y. Ma, F. Y. Niu and D. M. Guo	327
9-7	Basic phenomena in high power fiber laser welding of thick section materials A. Salminen, E. Lappalainen and T. Purtonen	331

10 Laser Technology – Additive Manufacturing

10-1	Characterisation of test results of the performance of additive manufacturing parts obtained by selective laser sintering processes incorporating glass and carbon fibres F. Fernández, M. M. Artigues, M. Ballester, J. Canela, R. Molera and A. Mora.....	339
10-2	Laser deposition of Ti-6Al-4V wire with varying WC composition for functionally graded components P. K. Farayibi, A. T. Clare, J. A. Folkes, D. G. McCartney and T. E. Abioye.....	343
10-3	Laser cladding of rail steel with Co-Cr A. T. Clare, O. Oyelola, T. E. Abioye and P. K. Farayibi.....	349
10-4	Concurrent Inconel 625 wire and WC powder laser cladding on AISI 304 stainless steel T. E. Abioye, J. Folkes, D. G. McCartney and A. T. Clare.....	355
10-5	Evaluation of effect of heat input in laser assisted additive manufacturing of stainless steel M. E. Islam, A. Lehti, L. Taimisto, H. Piili, O. Nyrhilä and A. Salminen	361
10-6	Comparison of theoretical and practical studies of heat input in laser assisted additive manufacturing of stainless steel M. E. Islam, L. Taimisto, H. Piili, O. Nyrhilä and A. Salminen	365
10-7	Balling phenomena in Selective Laser Melting (SLM) of pure Gold (Au) N. A. Sheikh, M. Khan, K. Alam, H. I. Syed, A. Khan and L. Ali	369
10-8	Formability of micro material pre-forms generated by laser melting H. Brüning and F. Vollertsen	373
10-9	Modeling of coaxial single and overlap-pass cladding with laser radiation N. Pirch, S. Keutgen, A. Gasser, K. Wissenbach and I. Kelbassa.....	377
10-10	High speed LAM I. Kelbassa, A. Gasser, W. Meiners, G. Backes and B. Müller.....	381
10-11	Supersonic Laser Deposition of Corrosion and Wear Resistant Materials A. Cockburn, R. Lupoi, M. Sparkes and W. O'Neill	387

11 Laser Technology – Modelling

11-1	Modelling of direct metal laser sintering of EOS DM20 bronze using neural networks and genetic algorithms A. Singh, D. E. Cooper, N. J. Blundell, G. J. Gibbons and D. K. Pratihari.....	395
11-2	A thermo-mechanical model for laser processing of metallic alloys A. Suárez, J. M. Amado, M. J. Tobar and A. Yáñez.....	399
11-3	Transient numerical simulation of CO ₂ laser fusion cutting of metal sheets: Simulation model and process dynamics S. Kohl, K. Leitz and M. Schmidt.....	403
11-4	Numerical methods for laser path calculation for surface treatment of dies and moulds Y. Liu, R. Ur-Rehman, D. Heinen and L. Glasmacher	407

12 Laser Technology – Surface Engineering

12-1	Microstructures and performances of the WC-10Co4Cr coatings deposited by laser hybrid plasma spraying technology S. Q. Li, S. L. Gong, Y. P. Duan and S. H. Liu	413
12-2	A spectroscopic and theoretical photo-thermal approach for analysing the laser ablated structures M. Stafe	417
12-3	Process and properties research on 17-4PH stainless steel by laser synchronous hybrid hardening Y. O. Jianhua, S. Junhao, Q. Zhang and F. Kong.....	421
12-4	Fiber laser surface texturing of TiN coatings and their resistance to scratch test A. G. Demir, N. Lecis, B. Previtali and D. Ugues	425
12-5	Parallel direct patterning of ITO thin films using ultra short pulses P. Fitzsimons, Z. Kuang, W. Perrie, S. Edwardson, G. Dearden and K. G. Watkins.....	429
12-6	Laser resonant excitation of precursor molecules in chemical vapor deposition of diamond thin films and crystals Y. F. Lu, Z. Q. Xie, L. S. Fan and Y. S. Zhou	433
12-7	Characterization of the power relationship in laser bonding of linear low density polyethylene film to polypropylene using a commercial adhesive C. F. Dowding and J. Lawrence	445

Proceedings of the 37th International MATADOR
Conference

Hinduja, S.; Li, L. (Eds.)

2013, XVIII, 450 p., Hardcover

ISBN: 978-1-4471-4479-3
