1	Humanitarian Demining Techniques	1
1.1	Landmines Threats	1
1.1.1	Countries Affected to Various Degrees by Mines and Unexploded Ordnance	1
1.1.2	Landmines Obstacles	3
1.1.3	Demining Stress Factors	4
1.2	Humanitarian Demining Technology	5
1.2.1	Specification of Mine Clearance Quality	7
1.3	Efficiency of Demining Techniques	8
1.3.1	Classification of Demining Machines	8
1.3.2	Demining Conditions	13
1.3.3	Efficiency of Deminers	15
1.3.4	Efficiency of Mine Detection Dogs	16
1.3.5	Efficiency of Demining Machines	16
1.3.6	Experience of the Machine Demining	18
1.3.7	Role of Machine Demining	24
	References	26
2	Mechanics of Machine Demining	29
2.1	Soil Categorization	30
2.2	Soil Trafficability	31
2.2.1	Mean Maximum Pressure	31
2.2.2	Soil Cone Index	33
2.2.3	Wheel Rut Depth	35
2.2.4	Mobility Index, MI	36
2.3	Toolbox Demining System	37
2.4	Soil Digging Resistance	39
2.4.1	Soil Cutting Resistance	39
2.4.2	Flail Force Impulse	40

2.5	Demining Machines with Flails	41
2.5.1	Flail Mechanics	41
2.5.2	Hammer Shapes	45
2.5.3	Machine Power	49
2.5.4	Flail Design	51
2.5.5	Flail Geometry	55
2.6	Demining Machine with Tillers	61
2.6.1	Helix System	62
2.6.2	Cutting Resistance	63
2.7	Demining Machine with Rollers	65
2.7.1	Heavy Mine Rollers	66
2.7.2	Medium Mine Rollers	70
	References	72
3	Design of Demining Machines	73
3.1	Project Requirements	74
3.1.1	Demining Machine Structure	76
3.1.2	Operating Conditions	77
3.1.3	Performance Requirements	77
3.1.4	Design Requirements	78
3.1.5	Reliability Requirements	79
3.1.6	Documentation Requirements	82
3.1.7	Testing Requirements	82
3.1.8	Evaluation Model	83
3.2	Design of Light Demining Machine	84
3.2.1	Soil Digging	84
3.2.2	Drive System	85
3.2.3	Cooling System and Air Cleaning	89
3.2.4	Flail System and Soil Digging Profile	92
3.2.5	Machine Control	94
3.2.6	Machine Characteristics	97
3.2.7	Assessment of Acceptability	98
3.2.8	Light Demining Machine with Rollers	101
3.2.9	Mini Demining Bulldozer	103
3.2.10	Advanced Demining Systems	104
3.2.11	Autonomous Unmanned Mine Clearing Robot Concept	108
3.3	Design of Medium Demining Machine	111
3.3.1	Use of Medium Machines	112
3.3.2	Requirements for Development	114
3.3.3	Soil Resistance and Flail Power	117
3.3.4	Engine and Transmission	125
3.3.5	Machine Efficiency	129

3.4	Design of Heavy Demining Machine	130
3.4.1	Concept of Two Flails	130
3.4.2	Flail and Tiller Concept	134
3.4.3	Machine Resistance on Mines	135
3.4.4	Conclusion	137
3.5	Support Demining Machines	138
3.5.1	Demining Excavators	139
3.5.2	Excavator Long Reach	140
3.5.3	Operator Safety	140
3.6	Ecological Demining Machine	141
3.6.1	Machine Acceptability Eco Model	145
3.6.2	DE Drive System	149
3.6.3	Electric Demining Machine	151
	References	151
4	Design of Mine Protected Vehicles	153
4.1	Project Requirements	153
4.2	Selection of Chassis	155
4.2.1	Cross-Country Mobility	155
4.2.2	Selection of Chassis and Mobile Mechanic Workshop	156
4.2.3	Armour Material	157
4.3	Mine Protected Vehicle Design	158
4.3.1	Safety Compartment	158
4.3.2	Crew Protection Standards	159
4.4	Level of Ballistic Protection	160
4.5	Cone of Destruction	162
4.6	Verification of Countermine Protection	163
4.7	Protection Against Impulse Noise and Vibrations	166
4.7.1	Survivability of the Crew	166
4.7.2	Protection Packages	166

5	Personal Protective Equipment	169
5.1	Personal Protective Equipment of the Machine Operator	170
5.1.1	Machine Operator Risk with a Remote Controlled Machine	171
5.1.2	Protective Vest, Helmet and Footwear	172
5.2	Requirements for Personal Protective Equipment	172
5.2.1	Definition of V50 Value	173
5.2.2	Helmet and Visor Characteristics	174
5.2.3	Protective Vest Characteristics	175

5.2.4	Mine Protective Boots and Covers	175
5.2.5	Acceptance Criteria	176
	References	177
6	Test and Evaluation of Demining Machines	179
6.1	Criteria for Evaluation of Demining Machines	179
6.2	Demining Machine Performance	181
6.2.1	Soil Digging Depth Profile	181
6.3	Survivability and Protection	183
6.3.1	Operator Protection Against Mine Fragments	184
6.3.2	Protection Against Impulse Noise	186
6.3.3	Protection Against Vibrations	187
6.4	<i>Cerovac</i> Test Range	189
6.4.1	Demining Machine Testing Area	190
6.4.2	Detection Dog and Dog Handler Testing Area	192
6.4.3	All Detector Types Testing Area	194
6.4.4	Personnel Training Area	194
6.5	Demining Machine Testing Process	195
6.5.1	Preparation of Documentation	196
6.5.2	Testing of Depth and Efficiency	196
6.5.3	Machine Testing on AP Mines	198
6.5.4	Machine Testing on AT Mines	200
6.5.5	Machine Operator Protection Testing	201
6.5.6	Demining Machine Usage Acceptability	202
6.5.7	Annual Compliance Testing	203
6.5.8	Conclusion	204
6.6	Research of Machine Usage on Soft Soil	204
6.6.1	New Loose Soil Layer—"Banana Layer"	205
6.6.2	Soil Trafficability in the Domain of Terramechanics	206
6.6.3	Conclusion	207
