

# Contents

<b>1</b>	<b>Polynomials, Computers, and Kinematics for the 21st Century . . .</b>	<b>1</b>
	J. Michael McCarthy	
<b>2</b>	<b>Kinematic Synthesis . . . . .</b>	<b>13</b>
	J. Michael McCarthy	
<b>3</b>	<b>Synthesis of Spatial Mechanisms to Model Human Joints . . . . .</b>	<b>49</b>
	Vincenzo Parenti-Castelli and Nicola Sancisi	
<b>4</b>	<b>Kinematics and Algebraic Geometry . . . . .</b>	<b>85</b>
	Manfred L. Husty and Hans-Peter Schröcker	
<b>5</b>	<b>Applying Numerical Algebraic Geometry to Kinematics . . . . .</b>	<b>125</b>
	Charles W. Wampler and Andrew J. Sommese	
<b>6</b>	<b>The Kinematics of 3-D Cable-Towing Systems . . . . .</b>	<b>161</b>
	Qimi Jiang and Vijay Kumar	
<b>7</b>	<b>Compliant Mechanisms . . . . .</b>	<b>189</b>
	Larry L. Howell	
<b>8</b>	<b>Protein Molecules: Evolution’s Design for Kinematic Machines . . .</b>	<b>217</b>
	Kazem Kazerounian and Horea T. Ilieş
