

Preface

This book was developed by the contributors to the Workshop on 21st Century Kinematics to provide supplementary material for their presentations. This book was made possible by an award (CMMI-1068497) from the National Science Foundation.¹

I would like to express my sincere gratitude to James Schmeideler, Michael Stanislav, Phil Vogelwede and Erin Dolan for their assistance with coordinating the Workshop as part of the 2012 ASME Design Engineering Technical Conference, as well as to colleagues at Springer who prepared this volume.

Finally, I would like to gratefully acknowledge each of our contributors, Vincenzo Parenti-Castelli, Manfred Husty, Charles Wampler, Vijay Kumar, Larry Howell, and Kazem Kazerounian for their hard work in preparing this volume and their presentations at the Workshop, as well as for their ongoing commitment to the success of our Mechanisms and Robotics community, and for their friendship and inspiration over many years.

Irvine, CA

J. Michael McCarthy
