1	Introduction	1
1.1	Greenhouse Gas Mitigation and Energy Efficiency	2
1.2	Energy Efficiency and Greenhouse Gas Emissions in GEF Countries	3
1.3	The Global Energy Efficiency Gap	4
1.4	Book Objectives and Analysis Methodology	4
1.5	Book Structure	5
	References	6
2	Background and Literature Review on Energy Efficiency Gaps	9
2.1	Energy Efficiency Potential	10
2.2	Energy Efficiency Gaps and Market Barriers	10
2.3	Incremental Costs and Reasoning	14
2.4	Energy Policies and Measures to Close Gaps and Remove Barriers	17
2.5	Capacity Building to Close Efficiency Gaps and Remove Barriers	18
2.6	Technology Transfer to Close Gaps and Remove Barriers	19
2.7	Mobilizing Co-finance to Close Gaps and Remove Barriers	20
2.8	Energy Efficiency Cost-Effectiveness Analysis	21
2.9	Conclusions	21
	References	24
3	Overview of GEF Mandate in Energy Efficiency	27
3.1	The Global Environment Facility	28
3.2	Importance of Co-finance Partnerships	32
3.3	GEF Capacity Building Activities	32
3.4	Energy Efficiency is a GEF Priority	33
3.5	GEF Technology Transfer	34

3.5.1	Technology Transfer Pilot Projects	35
3.5.2	Technology Needs Assessments	35
3.5.3	Long-Term Implementation of the Poznan Strategic Program	36
3.6	Indicators of Progress	37
	References	37
4	A Representative Energy Efficiency Project	39
4.1	Introduction	40
4.2	China Industrial Boilers.	41
4.3	Barriers to Adopting Energy-Efficient Boilers	42
4.4	Project Feasibility Study	43
4.5	Project Objectives.	44
4.6	Project Description	44
4.7	Project Preparation	45
4.8	Linked Project	47
4.9	Project Costs and Finance	47
4.10	Procurement Arrangements	48
4.11	Project Implementation	49
4.12	Project Monitoring and Evaluation	50
4.13	Technical Assistance.	51
4.14	Project Sustainability	51
4.15	Post-Project Evaluation	52
4.16	Revised Estimation of the Global Environmental Benefits.	53
4.17	Lessons Learned and Experiences Gained	54
4.18	Project Summary	55
4.19	Conclusions	56
	References	57
5	Quantitative Methodology, Data Analysis, and Assumptions.	59
5.1	Analyzing GEF Energy Efficiency Projects	60
5.2	Quantitative Methodological Framework	61
5.3	Data Used in this Analysis	66
5.4	Analysis Assumptions and Limitations	68
6	GEF Energy Efficiency Investment Portfolio	71
6.1	GEF Investment Portfolio	72
6.2	GEF Investment Portfolio in Energy Efficiency	72
6.3	Geographic Distribution of the GEF Energy Efficiency Projects	74
6.4	Distribution of Energy Efficiency Projects Among GEF Agencies	75
6.5	Country Location and Status of GEF Energy Efficiency Projects	76

6.6	GEF Completed Energy Efficiency Projects	77
	Reference	79
7	Cost-Effectiveness of Energy Efficiency Investments	81
7.1	Introduction	82
7.2	GEF Co-finance in Energy Efficiency Projects	83
7.3	Project Preparation Period	83
7.4	Greenhouse Gas Emissions	85
7.5	Project Cost-Effectiveness	88
7.5.1	Appliances and Equipment	88
7.5.2	Industrial Processes	90
7.5.3	Energy Service Companies	92
7.5.4	National Strategy	95
7.5.5	Heating	96
7.5.6	Lighting	98
7.5.7	Others Investments	101
7.5.8	Finance	102
7.5.9	Energy Supply	104
7.5.10	Buildings	106
7.6	Major Outcomes of Projects with Intangible Investments	107
7.7	Conclusions	108
8	Completed Energy Efficiency Projects: A Portfolio-Level	
	Analysis of Funding	111
8.1	Introduction	112
8.2	Co-finance Resources	112
8.2.1	Co-finance Ratios	113
8.2.2	Portfolio Investment Resources	113
8.3	GEF and Total Funds by Project Activity	115
8.3.1	Asset Acquisition	117
8.3.2	Capacity Building	120
8.4	Funds Uses by Countries and by Agencies	124
8.4.1	GEF Resources and Co-finance by Partner Country	124
8.4.2	GEF Resources and Co-finance by Project Activity and by Country	128
8.4.3	Resources and Uses of Funds by GEF Agency	129
8.5	Conclusions	131
	References	133
9	Energy Efficiency Projects that Move Slowly	135
9.1	Introduction	136
9.2	Portfolio of Slow Moving Projects	138
9.3	Analysis of Slow Moving Projects	140

9.3.1	Lack of Forward Movement.	142
9.3.2	Actions on the Part of GEF	142
9.3.3	Actions on the Part of Host Countries.	143
9.3.4	Actions on the Part of the Implementing Agency	144
9.3.5	Project Transferred/Reallocated	145
9.4	Financial Analysis of Slow Moving Projects	146
9.5	Conclusions	147
	References	149
10	Conclusions and Implications	151
10.1	Key Conclusions	152
10.1.1	Project Cost-Effectiveness	153
10.1.2	Success in Co-finance	153
10.1.3	Technology Transfer	153
10.1.4	Policies Enhancement	154
10.1.5	Capacity Building	154
10.1.6	Importance of Project Preparation and Planning	155
10.2	Implications for Stakeholders	155
10.2.1	Implication for Donor Countries	155
10.2.2	Implication for Host Countries	156
10.2.3	Implication for Project Developers and Managers. . . .	157
10.2.4	Implications for Project Evaluation Practitioners and Academia	158
10.3	Limitations of the Analysis	159
10.4	Future Studies in this Area	159
