

# Contents

<b>1 Sustainable Development in Concrete Production</b>	<b>1</b>
1.1 Introduction	1
1.2 Sustainability in Construction Materials	2
1.3 Sustainability in Concrete Production.	4
1.4 Sustainability in Concrete by Improving Properties and Service Life of Concrete	5
1.5 Sustainability in Concrete by Innovation in Concrete Constituents	7
1.5.1 Sustainability in Water Use	8
1.5.2 Sustainability in Cement Production	8
1.5.3 Sustainability in the Aggregate Industry.	14
1.6 Use of Waste Materials as Aggregate in Concrete	15
1.7 Overview of the Book	18
1.8 Conclusions	19
References	20
<b>2 Industrial Waste Aggregates.</b>	<b>23</b>
2.1 Introduction	23
2.2 Types of Industrial Waste Aggregates	23
2.3 Coal Ash as an Aggregate in Concrete.	24
2.3.1 Bottom Ash	25
2.4 Industrial Slag.	32
2.4.1 Ferrous Slag.	32
2.4.2 Non-Ferrous Slag	43
2.5 Other Waste as Aggregate	49
2.6 Ceramic Industry Waste	53
2.7 Use of Plastic Waste as Aggregate	60
2.7.1 Types of Plastic Waste Used in the Preparation of Cement Mortar and Concrete	60
2.7.2 Sources and Preparations of Plastic Aggregate	61

2.7.3	Evaluation of Properties of Plastic Aggregate . . . . .	62
2.7.4	Types and Ratio of Substitution of Natural Aggregate by Plastic Aggregate in Cement Mortar/Concrete Mixes . . . . .	63
2.7.5	Properties of Plastic Aggregate . . . . .	64
2.8	Waste Tyre Rubber . . . . .	69
2.9	Concluding Remarks . . . . .	73
	References . . . . .	74
<b>3</b>	<b>Construction and Demolition Waste Aggregates . . . . .</b>	<b>81</b>
3.1	Introduction . . . . .	81
3.2	Preparation of CDW Aggregate . . . . .	82
3.3	Composition of CDW Aggregates . . . . .	82
3.4	Attached Mortar Contents in CDW Aggregate and Methods of Evaluation . . . . .	85
3.5	Properties of CDW Aggregate . . . . .	87
3.5.1	Density/Specific Gravity . . . . .	87
3.5.2	Water Absorption . . . . .	92
3.5.3	Porosity . . . . .	99
3.5.4	Mechanical Properties of CDW Aggregate . . . . .	99
3.5.5	Particle Shape and Texture . . . . .	102
3.5.6	Grading Size . . . . .	104
3.5.7	Other Properties . . . . .	106
3.6	Concluding Remarks . . . . .	108
	References . . . . .	109
<b>4</b>	<b>Use of Industrial Waste as Aggregate: Properties of Concrete . . . .</b>	<b>115</b>
4.1	Introduction . . . . .	115
4.2	Coal Bottom Ash . . . . .	115
4.2.1	Fresh Concrete Properties . . . . .	116
4.2.2	Hardened Concrete Properties . . . . .	118
4.2.3	Durability Behaviour . . . . .	124
4.2.4	Coal Fly Ash . . . . .	129
4.2.5	Other Coal Ash . . . . .	130
4.3	Steel Slag . . . . .	132
4.3.1	Fresh Concrete Properties . . . . .	132
4.3.2	Hardened Concrete Properties . . . . .	133
4.3.3	Durability Properties . . . . .	138
4.4	Blast Furnace Slag . . . . .	143
4.4.1	Fresh Concrete Properties . . . . .	144
4.4.2	Hardened Concrete Properties . . . . .	145
4.4.3	Durability Performance . . . . .	147
4.5	Non-Ferrous Slag . . . . .	149
4.5.1	Copper Slag as Aggregate in Concrete . . . . .	149
4.5.2	Other Non-Ferrous Slag . . . . .	154

4.6	Plastic Waste . . . . .	156
4.6.1	Fresh Concrete Properties . . . . .	156
4.6.2	Mechanical Properties . . . . .	158
4.6.3	Durability Performance . . . . .	167
4.6.4	Other Properties . . . . .	172
4.7	Rubber Waste . . . . .	174
4.7.1	Fresh Concrete Properties . . . . .	174
4.7.2	Hardened Concrete Properties . . . . .	178
4.7.3	Durability Parameters . . . . .	191
4.8	Ceramic Industry Waste . . . . .	198
4.8.1	Fresh Concrete Properties . . . . .	199
4.8.2	Mechanical Properties . . . . .	201
4.8.3	Durability Behaviour . . . . .	205
4.9	Other Waste Materials . . . . .	208
4.9.1	Oil Palm Shell . . . . .	208
4.9.2	Crushed Oyster Shell . . . . .	209
4.9.3	Low-Risk Meat and Bone Meal Bottom Ash . . . . .	211
4.9.4	Tobacco Waste and Spent Mushroom Substrate . . . . .	211
4.9.5	Pulp and Paper Mill Waste . . . . .	212
4.9.6	Wastes from the Shoe Industry . . . . .	212
4.9.7	Different Sludges . . . . .	213
4.9.8	Waste Generated from Mining Industry . . . . .	214
4.9.9	Waste from Metal Processing . . . . .	216
4.9.10	Marble Waste . . . . .	217
4.9.11	Waste from Wood Sawing . . . . .	218
4.10	Concluding Remarks . . . . .	218
	References . . . . .	219
<b>5</b>	<b>Use of Construction and Demolition Waste as Aggregate:</b>	
	<b>Properties of Concrete . . . . .</b>	<b>229</b>
5.1	Introduction . . . . .	229
5.2	Fresh Concrete Properties . . . . .	229
5.2.1	Workability . . . . .	230
5.2.2	Density . . . . .	235
5.2.3	Air-Content . . . . .	236
5.2.4	Bleeding . . . . .	239
5.3	Hardened Concrete Properties . . . . .	241
5.3.1	Compressive Strength . . . . .	241
5.3.2	Splitting Tensile Strength . . . . .	260
5.3.3	Flexural Strength . . . . .	269
5.3.4	Modulus of Elasticity . . . . .	276
5.3.5	Flexural and Shear Performances . . . . .	285
5.3.6	Stress–Strain Relationship . . . . .	287

5.3.7	Creep of Concrete . . . . .	288
5.3.8	Surface Hardness . . . . .	292
5.3.9	Other Mechanical Properties . . . . .	294
5.3.10	Failure Mode . . . . .	296
5.3.11	Ultrasonic Pulse Velocity . . . . .	296
5.4	Durability Performance . . . . .	297
5.4.1	Drying Shrinkage . . . . .	298
5.4.2	Permeability Properties . . . . .	305
5.4.3	Depth of Carbonation . . . . .	319
5.4.4	Freeze–Thaw Durability . . . . .	323
5.4.5	Alkali-Aggregate Reactivity and Resistance to Harsh Chemical Substances . . . . .	325
5.4.6	Other Durability Properties . . . . .	327
5.5	Conclusions . . . . .	330
