

Contents

Part I Internetworks

1	The Internet	3
1.1	History	3
1.2	Architecture and Design Principles	7
1.3	Limitations and the Quest for a Future Internet	9
1.4	Summary	11
2	A Survey of Novel Internetwork (and Naming) Architectures	13
2.1	Classifying Network Architectures	13
2.1.1	Classification Approach	14
2.1.2	Service-Model Perspective	14
2.2	Technical Reference	16
2.2.1	Communication-Oriented	16
2.2.2	Information-Oriented	25
2.2.3	Computation-Oriented	32
2.3	Conclusion	33

Part II Naming and Discovery

3	Naming	37
3.1	Naming and Forwarding	38
3.1.1	Names, Addresses, and Bindings	38
3.1.2	Forwarding, Discovery, and Namespaces	40
3.1.3	Illustrative Example	42
3.2	Properties of Names	44
3.2.1	Syntactic	45
3.2.2	Semantic	45
3.3	Properties of Bindings	46
3.3.1	Temporal	46
3.4	Discovery	47
3.5	Naming Services Case Studies	48

3.5.1	Domain Name System	48
3.5.2	Layered Naming	51
3.6	Conclusion	53
4	A Taxonomy of Naming Architectures	55
4.1	Introduction	55
4.2	Background	56
4.3	Taxonomy	57
4.3.1	Instructions	57
4.3.2	Naming/Addressing Modes	58
4.3.3	Naming/Addressing Types	59
4.4	Discussion and Conclusion	60
5	On the Feasibility of Dynamic, Efficient, and Scalable Name-Based Discovery Systems	63
5.1	Introduction	64
5.2	Compact Routing Model	67
5.2.1	Background	67
5.2.2	Optimal Universal NICR	70
5.2.3	The Internet	72
5.3	Navigating in a Small World	75
5.4	Conclusion	78
6	Discovery Service Differentiation	81
6.1	Introduction and Motivation	81
6.2	What is Multi-Level Discovery (MLD)?	82
6.3	A Multi-Level Discovery Scheme	83
6.3.1	Background: NICR Scheme on Trees	83
6.3.2	Extending Laing's Scheme	85
6.4	Discussion and Conclusion	86
Part III Economics of Discovery		
7	On the Economics of Identifier-Based Discovery	91
7.1	Introduction	91
7.2	Background	93
7.2.1	Networks and Strategic Behavior	93
7.2.2	Discovery versus Search	98
7.3	A Taxonomy of Discovery Schemes	99
7.4	Incentives and Pricing	101
7.5	Conclusion	103
8	Participation Incentives in BGP	105
8.1	Introduction	105
8.1.1	A Simple Distribution Model	106
8.1.2	Results	108
8.2	The General Game	109
8.3	Convergence Under HRP	112

8.4	Equilibria	113
8.4.1	The Static Multi-Stage Game with Fixed Schedule	114
8.4.2	Growth of Incentives	119
8.4.3	A Special Subgame	120
8.4.4	Competition Rewards	122
8.4.5	The Repeated Game	124
8.5	Related Work	127
8.6	Discussion and Conclusion	128
Appendix	Existence of $g_K(x)$	128
