|----------|--|-----------|
| 1 | Introduction | 1 |
| | References | 2 |
| 2 | Finite Element Formulations | 3 |
| 2.1 | Quasi-Static Formulations | 5 |
| 2.2 | Dynamic Formulation | 7 |
| | References | 9 |
| 3 | Coupled Finite Element Flow Formulation | 11 |
| 3.1 | State-of-the-Art | 11 |
| 3.2 | Theoretical Background | 14 |
| 3.2.1 | Plastic Flow | 14 |
| 3.2.2 | Heat Transfer | 16 |
| 3.2.3 | Electricity | 18 |
| 3.3 | Numerical Implementation | 19 |
| 3.3.1 | Basic Coupling Procedures | 19 |
| 3.3.2 | Finite Elements | 20 |
| 3.3.3 | Mechanical Model | 21 |
| 3.3.4 | Thermal Model | 25 |
| 3.3.5 | Electrical Model | 26 |
| 3.4 | Incorporation of Anisotropy | 27 |
| 3.4.1 | Rotation Between Global Axes and Material Axes | 30 |
| 3.5 | Incorporation of Elastic Effects | 31 |
| | References | 35 |
| 4 | Contact Modeling | 37 |
| 4.1 | Contact Between Workpiece and Tooling | 38 |
| 4.2 | Contact Between Deformable Bodies | 40 |
| 4.2.1 | Frictionless Contact | 43 |
| 4.2.2 | Sticking Contact | 45 |
| 4.2.3 | Frictional Contact | 45 |
| 4.2.4 | Electrical and Thermal Contact | 46 |

| | | |
|----------|--|-----------|
| 4.3 | Application of Contact Modeling | 47 |
| | References | 49 |
| 5 | Meshing and Remeshing | 51 |
| 5.1 | Description of Tooling | 52 |
| 5.2 | Isoparametric Structured Meshing | 54 |
| 5.3 | All-Hexahedral Unstructured Meshing | 55 |
| 5.3.1 | Identification of Geometric Features and Selection of Core Mesh | 55 |
| 5.3.2 | Reconstruction of Geometry | 57 |
| 5.3.3 | Edge Repairment | 59 |
| 5.3.4 | Smoothing | 60 |
| 5.3.5 | Application of All-Hexahedral Meshing | 60 |
| 5.4 | Remeshing | 61 |
| 5.4.1 | Multi-Object Procedures and Tool Contact | 63 |
| 5.4.2 | Transfer of History Dependent Variables | 63 |
| | References | 64 |
| 6 | Parallelization of Equation Solvers | 67 |
| 6.1 | Strategies of Solution Techniques | 67 |
| 6.2 | Parallel Skyline Solver | 68 |
| 6.3 | Comparison of Skyline Solver with Other Solvers | 70 |
| 6.4 | Performance Evaluation of Parallel Skyline Solver | 72 |
| 6.4.1 | Evaluation by a Resistance Welding Case | 73 |
| | References | 76 |
| 7 | Material, Friction and Contact Characterization | 79 |
| 7.1 | Mechanical Properties at Room Temperature | 79 |
| 7.2 | Friction Characterization | 81 |
| 7.3 | Mechanical Properties at Elevated Temperatures | 83 |
| 7.4 | Electrical Contact Properties | 84 |
| | References | 87 |
| 8 | Applications | 89 |
| 8.1 | Mechanical Joining of Tubes | 89 |
| 8.1.1 | Asymmetric Compression Beading | 90 |
| 8.1.2 | Application | 93 |
| 8.2 | Resistance Spot Welding | 93 |
| 8.2.1 | Three Sheet Spot Welding | 94 |
| 8.2.2 | Electrode Misalignment | 97 |
| 8.2.3 | Shunt Effect | 99 |
| 8.3 | Projection Welding by Longitudinal Embossment | 101 |
| 8.4 | Welding of Bellow to Disc by Natural Projection | 104 |
| 8.5 | Micro Joining of Fork and Wire | 109 |
