

# Contents

<b>1</b>	<b>The Future of the Energy Mix Paradigm</b>	<b>1</b>
1.1	Current Status in Photovoltaics	1
1.1.1	Solar Cells Efficiency	2
1.1.2	PV Market	4
1.2	The Energy Mix	6
1.3	Understating PV Systems Variability	9
1.4	Book Outline	11
	References	13
<b>2</b>	<b>Solar Radiation Measurements</b>	<b>17</b>
2.1	Solar Radiation Components at the Ground Level	17
2.2	Ground Measurements of Solar Radiation	20
2.2.1	Solar Radiometers	20
2.2.2	Surface Measurements	24
2.3	Solar Radiation Derived from Satellite Observation	29
2.3.1	Satellite Based Models for Deriving Solar Radiation	30
2.3.2	Online Available Databases	34
2.4	Data Assessment Related to PV Power Forecasting	35
2.5	Numerical Weather Prediction Models	36
2.5.1	NWP Categories	37
2.5.2	NWP for Renewable Energy Forecasting	38
	References	39
<b>3</b>	<b>State of the Sky Assessment</b>	<b>43</b>
3.1	Traditional Indicators for the State of the Sky	44
3.1.1	Cloud Amount	44
3.1.2	Relative Sunshine	61
3.1.3	Clearness Index	64
3.2	Sunshine Number	72

3.2.1	Statistical Properties . . . . .	73
3.2.2	Time Averaged Statistical Measures . . . . .	75
3.2.3	Comparison with Measurements . . . . .	75
3.2.4	Summary and Discussion. . . . .	85
References	. . . . .	86
<b>4</b>	<b>Stability of the Radiative Regime . . . . .</b>	<b>89</b>
4.1	Measures for Day Classification (Cloud Shade, Clearness Index, Fractal Dimension) . . . . .	89
4.1.1	Classes of Cloud Shade. . . . .	89
4.1.2	Classes of Observed Total Cloud Cover Amount . . . . .	90
4.1.3	Classes of Clearness Index . . . . .	90
4.1.4	Classes Based on Fractal Dimension. . . . .	91
4.1.5	Application . . . . .	92
4.2	The Sunshine Stability Number . . . . .	96
4.3	The Radiative Regime. Disorder and Complexity . . . . .	99
4.4	The Radiative Regime. Days Ranking. . . . .	100
4.5	The Radiative Regime. Sequential Characteristics . . . . .	103
4.5.1	Sunshine Number. Sequential Characteristics. . . . .	104
4.5.2	Sunshine Stability Number. Sequential Characteristics . . . . .	116
4.5.3	ARIMA Models Forecasting . . . . .	118
4.5.4	Summary and Discussion. . . . .	124
References	. . . . .	125
<b>5</b>	<b>Modeling Solar Radiation at the Earth Surface . . . . .</b>	<b>127</b>
5.1	General Algorithm . . . . .	127
5.2	Variation of Extraterrestrial Radiation. . . . .	129
5.3	Solar Radiation Through Earth's Atmosphere . . . . .	132
5.3.1	Modeling the Effects of Cloudless Atmosphere on ETR . . . . .	132
5.3.2	Optical Air Mass . . . . .	134
5.3.3	Spectral Models for Atmospheric Transmittances . . . . .	137
5.3.4	Parametric Models for Solar Irradiance . . . . .	145
5.3.5	Empirical Models for Solar Irradiance. . . . .	153
5.4	Computation of the Clear-Sky Solar Irradiation . . . . .	157
5.5	Cloud Amount Influence on Solar Radiation . . . . .	158
5.5.1	Relative Sunshine-Based Correlations . . . . .	160
5.5.2	Cloud Cover Amount-Based Correlations . . . . .	162
5.5.3	Air Temperature-Based Correlations . . . . .	163
5.6	Solar Irradiance on Tilted Surfaces . . . . .	165
5.6.1	Estimation of Total Solar Irradiance . . . . .	165
5.6.2	Solar Irradiance on Surfaces Tracking the Sun. . . . .	171

5.6.3	Comparison of Energy Collected on Surfaces with Different Orientations . . . . .	173
5.7	Summary and Conclusion . . . . .	174
	References . . . . .	175
<b>6</b>	<b>Time Series Forecasting . . . . .</b>	<b>181</b>
6.1	ARIMA Modeling of Solar Irradiance . . . . .	182
6.1.1	Database . . . . .	183
6.1.2	ARIMA Models . . . . .	188
6.2	ARIMA Modeling of Solar Irradiation . . . . .	198
	References . . . . .	201
<b>7</b>	<b>Fuzzy Logic Approaches . . . . .</b>	<b>203</b>
7.1	Artificial Intelligence Techniques . . . . .	203
7.1.1	Artificial Neural Networks . . . . .	204
7.1.2	Fuzzy Logic . . . . .	208
7.2	Models for Estimating Solar Irradiance and Irradiation . . . . .	216
7.2.1	Modeling Atmospheric Transmittance . . . . .	217
7.2.2	Modeling Diffuse Irradiance on Inclined Surface . . . . .	221
7.2.3	Solar Irradiation From Sunshine Duration . . . . .	223
7.3	A Model for Nowcasting Solar Irradiance . . . . .	225
7.3.1	Five Minutes Forecasting of $k_t$ . . . . .	229
7.4	A Model for Forecasting Solar Irradiation . . . . .	230
	References . . . . .	236
<b>8</b>	<b>Air Temperature-Based Models . . . . .</b>	<b>239</b>
8.1	Introduction . . . . .	239
8.2	Solar Irradiance Modeling . . . . .	240
8.2.1	SEAT Equations . . . . .	241
8.2.2	SEAT Accuracy to the Computation of Solar Irradiance . . . . .	242
8.2.3	Daily Irradiation Computation . . . . .	244
8.2.4	Extending the Application Area . . . . .	245
8.2.5	Model Application . . . . .	246
8.3	Ångström-Type Equations . . . . .	247
8.3.1	El Metwally' Models . . . . .	247
8.3.2	RadEst Tool . . . . .	248
8.3.3	AEAT Models . . . . .	249
8.4	Fuzzy Models . . . . .	252
8.5	On the Temperature-Based Models Accuracy . . . . .	256
8.5.1	SK Model . . . . .	257
8.5.2	El Metwally' Models . . . . .	257
8.5.3	SEAT Model . . . . .	258
8.5.4	AEAT Models . . . . .	260
8.5.5	Fuzzy Model . . . . .	262

8.6	Simulation of Forecasting Daily Global Solar Irradiation. . . . .	264
8.6.1	Generation of the Synthetic Daily Air Temperature Amplitude Time Series. . . . .	264
8.6.2	Air Temperature-Based Model . . . . .	266
8.6.3	Assessment of Results. . . . .	266
8.7	Summary and Discussion. . . . .	268
	References . . . . .	268
<b>9</b>	<b>Outdoor Operation of PV Systems . . . . .</b>	<b>271</b>
9.1	Introduction . . . . .	271
9.2	Computing PV Modules' Performance . . . . .	273
9.2.1	Standard V–I Characteristic of a Solar Cell . . . . .	274
9.2.2	PV Modules. . . . .	278
9.3	Modeling PV Module Operating Outdoor . . . . .	282
9.3.1	Five-Parameter Model. . . . .	284
9.3.2	Four-Parameter Model. . . . .	288
9.3.3	Three-Parameter Model. . . . .	295
9.3.4	Translation Equations . . . . .	298
9.3.5	PV Shading . . . . .	302
9.4	PV Modules Operating in Outdoor Conditions . . . . .	304
9.4.1	Experimental Setup. . . . .	304
9.4.2	Variation of Modules Efficiency. . . . .	305
9.4.3	Numerical Examples. . . . .	309
9.5	Inverters . . . . .	313
9.5.1	Inverter Parameters. . . . .	314
9.5.2	Inverter Efficiency . . . . .	315
9.5.3	Inverter Sizing . . . . .	317
9.6	Summary and Conclusion . . . . .	322
	References . . . . .	323
<b>10</b>	<b>Forecasting the Power Output of PV Systems . . . . .</b>	<b>325</b>
10.1	Forecasting the Output Power: Facts. . . . .	329
10.1.1	Statistical-Based Models . . . . .	329
10.1.2	ANN-Based Models . . . . .	333
10.1.3	Comparison of Models Performance . . . . .	338
10.2	Smoothing PV Power variability . . . . .	340
	References . . . . .	344
<b>11</b>	<b>Perspectives . . . . .</b>	<b>347</b>
