

Contents

1	Introduction and Summary	1
1	The Topic	1
2	The Literature	4
3	Content and Results	5
	References	9
2	Pollution Under Hybrid Environmental Regulation: The Case of Space Heating	11
1	Introduction	11
2	Assumptions	14
3	Impact on Pollution: Theoretical Analysis	16
3.1	Symmetric Regulation	19
3.2	Hybrid Regulation	23
3.3	The Overall Framework	27
4	Impact on Pollution: Simulations	31
5	Conclusions	40
	Appendix	41
	References	43
3	Pollution Under Environmental Regulation Within Multi-Period Auctions: The Case of Electricity Markets	45
1	Introduction	45
2	The Basic Model	46
2.1	Assumptions	46
2.2	Equilibria	49
3	The Effect on Market Power	52
4	The Effect on Pollution	53
5	Conclusions	56
	Appendix	57
	References	64

4	Pollution Under Imperfect Competition in Vertical Related Energy Markets	67
1	Introduction	67
2	The Basic Model: Assumptions	69
2.1	The Environmental Regulation	69
2.2	The Natural Gas Market	70
2.3	The Power Market	71
3	Change in Gas Prices and Change in Marginal Costs of Power Generation	72
4	Change of Market Power in Electricity Market	76
4.1	Without Regulatory Pressure	77
4.2	With Regulatory Pressure	79
4.3	Overall Framework	81
5	Change in Prices and Pollution in Electricity Market	83
5.1	Without Regulatory Pressure	89
5.2	With Regulatory Pressure	93
5.3	Overall Framework	99
6	About the Assumptions and the Robustness of the Results	99
6.1	Isoelastic Demand	99
6.2	Variable Marginal Costs	101
6.3	Other Market Structures	102
6.4	Other Types of Free Allocation	104
7	Conclusions	105
	Appendix	106
	References	116

Pollution Under Environmental Regulation in Energy
Markets

Gulli, F.

2013, VIII, 116 p., Hardcover

ISBN: 978-1-4471-4726-8
