

Contents

1	Introduction	1
1.1	Contents and Suggestions for Further Reading	1
1.1.1	Basic Notions and Examples	1
1.1.2	Topological Dynamics	2
1.1.3	Low-Dimensional Dynamics	2
1.1.4	Hyperbolic Dynamics	3
1.1.5	Symbolic Dynamics	4
1.1.6	Ergodic Theory	4
1.2	Further Topics and Suggested References	5
1.3	Suggestions for Courses Based on the Book	5
2	Basic Notions and Examples	7
2.1	The Notion of a Dynamical System	7
2.2	Examples with Discrete Time	9
2.2.1	Rotations of the Circle	9
2.2.2	Expanding Maps of the Circle	10
2.2.3	Endomorphisms of the Torus	12
2.3	Examples with Continuous Time	14
2.3.1	Autonomous Differential Equations	14
2.3.2	Discrete Time Versus Continuous Time	18
2.3.3	Differential Equations on the Torus \mathbb{T}^2	20
2.4	Invariant Sets	20
2.5	Exercises	24
3	Topological Dynamics	27
3.1	Topological Dynamical Systems	27
3.2	Limit Sets and Basic Properties	29
3.2.1	Discrete Time	29
3.2.2	Continuous Time	34
3.3	Topological Recurrence	37
3.3.1	Topological Transitivity	37

3.3.2	Topological Mixing	39
3.4	Topological Entropy	41
3.4.1	Basic Notions and Examples	41
3.4.2	Topological Invariance	43
3.4.3	Alternative Characterizations	45
3.4.4	Expansive Maps	49
3.5	Exercises	54
4	Low-Dimensional Dynamics	57
4.1	Homeomorphisms of the Circle	57
4.1.1	Lifts	57
4.1.2	Rotation Number	62
4.1.3	Rational Rotation Number	64
4.1.4	Irrational Rotation Number	67
4.2	Diffeomorphisms of the Circle	71
4.3	Maps of the Interval	74
4.3.1	Existence of Periodic Points	74
4.3.2	Sharkovsky's Theorem	78
4.4	The Poincaré–Bendixson Theorem	82
4.5	Exercises	83
5	Hyperbolic Dynamics I	87
5.1	Smooth Manifolds	87
5.2	Hyperbolic Sets	89
5.2.1	Basic Notions	89
5.2.2	Smale Horseshoe	91
5.2.3	Continuity of the Stable and Unstable Spaces	96
5.3	Hyperbolic Sets and Invariant Families of Cones	100
5.3.1	Formulation of the Result	100
5.3.2	Existence of Invariant Families of Cones	102
5.3.3	Criterion for Hyperbolicity	105
5.4	Stability of Hyperbolic Sets	107
5.5	Exercises	109
6	Hyperbolic Dynamics II	113
6.1	Behavior Near a Hyperbolic Fixed Point	113
6.1.1	The Grobman–Hartman Theorem	113
6.1.2	The Hadamard–Perron Theorem	120
6.2	Stable and Unstable Invariant Manifolds	131
6.2.1	Existence of Invariant Manifolds	131
6.2.2	Local Product Structure	135
6.3	Geodesic Flows	137
6.3.1	Hyperbolic Geometry	137
6.3.2	Quotients by Isometries	142
6.3.3	Geodesic Flow	144
6.3.4	Hyperbolic Flows	147
6.4	Exercises	150

7	Symbolic Dynamics	153
7.1	Basic Notions	153
7.1.1	Shift Map	153
7.1.2	Topological Entropy	155
7.1.3	Two-Sided Sequences	156
7.2	Examples of Codings	157
7.2.1	Expanding Maps	157
7.2.2	Quadratic Maps	161
7.2.3	The Smale Horseshoe	162
7.3	Topological Markov Chains	164
7.3.1	Basic Notions	164
7.3.2	Periodic Points	165
7.3.3	Topological Entropy	167
7.3.4	Topological Recurrence	169
7.4	Horseshoes and Topological Markov Chains	172
7.5	Zeta Functions	175
7.6	Exercises	178
8	Ergodic Theory	181
8.1	Notions from Measure Theory	181
8.2	Invariant Measures	183
8.3	Nontrivial Recurrence	188
8.4	The Ergodic Theorem	189
8.5	Metric Entropy	191
8.6	Proof of the Ergodic Theorem	194
8.7	Exercises	200
	References	203
	Index	207

Dynamical Systems

An Introduction

Barreira, L.; Valls, C.

2013, IX, 209 p. 44 illus., Softcover

ISBN: 978-1-4471-4834-0
