Part I Principles of Loads and Failure Mechanisms

1	Introduction: The Basics of Failure	3
1.1	Failure	3
1.2	Balance	4
1.3	External and Internal Loads	6
1.4	Load Types and Failure Mechanisms	6
1.5	Character of the Load	6
1.6	Perspectives	8
1.7	Summary	9
2	External Loads	11
2.1	Introduction	11
2.2	Mechanical Loads	11
2.2.1	Environment and Pressure	13
2.2.2	Weight	14
2.2.3	Acceleration	15
2.2.4	Drive/Propulsion/Guidance	17
2.2.5	Thermal Expansion	24
2.2.6	Internal Stress	25
2.2.7	Internal Forces	28
2.3	Thermal Loads	31
2.3.1	Conduction	31
2.3.2	Convection	32
2.3.3	Radiation	32
2.3.4	External Heat Generation	34
2.3.5	Internal Heat Generation	34
2.4	Electric Loads	36
2.4.1	Sources	39

2.5	Chemical Loads	42
2.6	Radiative Loads	44
2.7	Summary	44
	References	44
	Further Reading	44
3	Internal Loads	45
3.1	Introduction.	45
3.2	Mechanical Loads	45
3.2.1	One- and Two-Dimensional Stress States	46
3.2.2	Three-Dimensional Stress States	50
3.2.3	Principal Stress	51
3.2.4	Equivalent Stress	53
3.2.5	Elastic Deformation	53
3.2.6	Plastic Deformation	57
3.2.7	Thermal Stress.	61
3.2.8	Stress Concentration.	63
3.2.9	Contact Stress	64
3.2.10	Stress Around Cracks	67
3.3	Thermal Loads	70
3.4	Electric Loads	73
3.4.1	Electric Properties	73
3.4.2	Semiconductors	75
3.4.3	Electric Field and Current Density	76
3.4.4	Dielectric Behaviour.	78
3.5	Chemical Loads	79
3.5.1	Electrochemical Reactions.	79
3.5.2	Electrode Potentials	80
3.5.3	Electrochemical Loads	82
3.6	Radiative Loads	82
3.7	Summary	82
	References	83
	Further Reading	83
4	Failure Mechanisms	85
4.1	Introduction.	85
4.2	Static Overload	85
4.3	Deformation	88
4.4	Fatigue	89
4.4.1	Definitions for Cyclic Loads	90
4.4.2	Fatigue Mechanism	90
4.4.3	Low-Cycle and High-Cycle Fatigue	93
4.4.4	Life Assessment for Constant Amplitude Loads.	94
4.4.5	Life Assessment for Variable Amplitude Loads.	98
4.4.6	Fracture Mechanics	104

4.5	Creep	112
4.5.1	Creep Mechanism	112
4.5.2	Life Assessment.	113
4.6	Wear	114
4.6.1	Friction.	115
4.6.2	Lubrication	117
4.6.3	Wear Mechanisms	118
4.6.4	Adhesive Wear	119
4.6.5	Abrasive Wear.	120
4.6.6	Corrosive Wear	121
4.6.7	Surface Fatigue	121
4.6.8	Erosion.	122
4.6.9	Life Assessment.	124
4.7	Melting.	125
4.8	Thermal Degradation	125
4.9	Electric Failures.	127
4.9.1	Current Overload	128
4.9.2	Intrinsic Breakdown	130
4.9.3	Breakdown in Gas and Vacuum.	133
4.9.4	Electrostatic Discharge	135
4.9.5	Electromigration	135
4.9.6	Life Assessment.	136
4.10	Corrosion	138
4.10.1	Corrosion Rates	138
4.10.2	Corrosion Mechanisms	144
4.10.3	Corrosion Prevention	147
4.10.4	High-Temperature Oxidation and Hot Corrosion	148
4.11	Radiative Failures	150
4.12	Failure Processes	150
4.12.1	Failure Sequences	151
4.12.2	Interaction Between Failure Mechanisms	152
4.12.3	Case Study: Failure Mechanisms in a Ball Bearing	154
4.13	Summary	156
	References	156
	Further Reading	157

Part II Applications in Maintenance, Reliability and Design

5	Maintenance Concepts	161
5.1	Introduction.	161
5.2	Relation Between Maintenance and Availability	161
5.3	Maintenance Strategy	164
5.3.1	Reliability Centred Maintenance	165

5.3.2	Risk-Based Inspection	166
5.3.3	Integrated Logistics Support	166
5.3.4	Effectiveness Centred Maintenance	166
5.4	Maintenance Policies	167
5.4.1	Reactive Maintenance Policies.	167
5.4.2	Proactive Maintenance Policies	168
5.4.3	Aggressive Maintenance Policies	169
5.5	Preventive Maintenance Interval Determination	169
5.5.1	Moment in Life Cycle	170
5.5.2	Condition Assessment.	171
5.5.3	Prognostic Approach	172
5.6	Maintenance Performance	174
5.6.1	Measurement Methodology	175
5.6.2	Maintenance Performance Indicators	177
5.7	Summary	183
	References	183
	Further Reading	186
6	Usage- and Condition-Based Maintenance.	187
6.1	Introduction.	187
6.2	Uncertainty in Preventive Maintenance.	188
6.3	Model-Based Prognostics	190
6.3.1	Relation Between Usage, Loads and Degradation Rates	191
6.3.2	Uncertainty Reduction	192
6.3.3	Applications	193
6.4	Load- and Usage-Based Maintenance	194
6.4.1	Functional versus Technical Approach	194
6.4.2	Case Study Technical Approach: Gas Turbine Blade	197
6.4.3	Case Study Functional Approach: Military Combat Vehicle	205
6.5	Health and Condition Monitoring.	210
6.5.1	Condition Monitoring Techniques	211
6.5.2	Structural Health Monitoring.	214
6.5.3	Condition-Based Maintenance	216
6.6	Summary	221
	References	221
	Further Reading	223
7	Reliability Engineering.	225
7.1	Introduction.	225
7.2	Reliability Engineering Basics	226
7.2.1	Parametric Probability Density Functions	228
7.2.2	Mean Time to Failure and Mean Time to Repair.	230

7.2.3	Non-parametric Reliability Evaluation	231
7.3	Relevant Failure Parameter	233
7.3.1	Incorporating the Usage	236
7.3.2	Incorporating the Usage Severity or Loads	237
7.3.3	Incorporating the Condition.	240
7.4	Life Exchange Rates	241
7.5	Interpretation of Failure Data	243
7.5.1	Case Study Description.	244
7.5.2	Actual Failures versus Preventive Replacements	245
7.5.3	As Good as New Assumption	246
7.6	Stochastic Life Assessment	247
7.6.1	Stochastic Analysis	248
7.6.2	Failure Function.	249
7.6.3	Sampling Methods	250
7.6.4	Application	253
7.7	Summary	253
	References	254
	Further Reading	254
8	Failure Analysis	255
8.1	Introduction.	255
8.2	Methods	256
8.2.1	Failure Mode, Effects and Criticality Analysis.	256
8.2.2	Fault Tree Analysis	260
8.2.3	Pareto and Degraded Analysis	263
8.2.4	Root Cause Analysis	265
8.3	Mechanism-Based Failure Analysis	266
8.4	Case Studies	269
8.4.1	Centrifugal Pump.	270
8.4.2	Conclusions from Case Studies	275
8.5	Lists of Common Failures.	276
8.6	Decision Scheme for Failure Mechanisms Determination	276
8.7	Summary	285
	References	285
	Further Reading	285
9	Design	287
9.1	Introduction.	287
9.2	Life Cycle Management	287
9.3	Design for Maintenance	288
9.3.1	System Reliability	289
9.3.2	Maintainability	289
9.3.3	Supportability	290

9.4	Design Philosophies	290
9.4.1	Safe-life	291
9.4.2	Damage Tolerance	292
9.4.3	Application	293
9.5	Probabilistic Design	294
9.6	Summary	295
	References	295
	Further Reading	295
Index	297
