

Contents

1	Hydrogen as a Clean Energy Carrier	1
1.1	Historical Perspective	1
1.2	Physical Properties	9
1.3	Transportation	10
1.4	Storage	12
1.5	Applications	14
1.5.1	Reduction of GHG Emissions in the Residential Sector . . .	14
1.5.2	Comparative Life-Cycle Assessment of Hydrogen and Conventional Vehicles	17
1.6	Conclusions	20
	References	20
2	Nuclear Energy and Its Role in Hydrogen Production	21
2.1	Introduction	21
2.2	Nuclear Hydrogen Production	23
2.3	Energy Storage for Load Levelling	29
2.4	Heavy Oil Upgrading and Petrochemical Operations	38
2.5	Nuclear-Produced Hydrogen for the Transportation Sector	48
2.5.1	Transportation Sector Outlook	48
2.5.2	Hydrogen-Fuelled Road Transport	49
2.5.3	Hydrogen-Fuelled Railway Transport	53
2.5.4	Hydrogen-Fuelled Airway Transport	58
2.5.5	Hydrogen Role for Reducing Environmental Impact in Transportation Sector	59
2.6	Conclusions	61
	References	63

3	Worldwide Nuclear Energy Research Programs	65
3.1	Introduction	65
3.2	Development Programs of Advanced Nuclear Reactors	67
3.2.1	Generations of Nuclear Reactors	67
3.2.2	GIF and Its Proposed Technology Development Roadmap	74
3.2.3	Non-GIF Reactor Development Programs and Initiatives	76
3.3	R&D Programs on Nuclear Hydrogen Systems	81
3.4	Illustrative Example: International Consortium on the Copper–Chlorine Cycle	90
3.5	Conclusions	95
	References	96
4	Water Electrolysis	99
4.1	Introduction	99
4.2	Fundamentals of Water Electrolysis	101
4.2.1	Thermodynamic Analysis	103
4.2.2	Kinetic Analysis	108
4.2.3	Transport Process Analysis	111
4.2.4	Equivalent Electric Diagram-Based Analysis	114
4.3	Alkaline Electrolyzers	116
4.4	Proton Exchange Membrane Electrolyzers	121
4.5	Solid Oxide Electrolyzers with O^{2-} Conduction	129
4.6	Solid Oxide Electrolyzers with H^+ Conduction	137
4.7	Hybrid Electrolysis Systems	140
4.8	Nuclear-Electrolytic Hydrogen Production Systems from Water	145
4.9	Conclusions	148
	References	151
5	Thermochemical Water-Splitting Cycles	153
5.1	Introduction	154
5.2	General Aspects	157
5.3	Thermochemical Water Splitting in a Single Reaction Step	158
5.4	Two-Step Thermochemical Cycles	166
5.5	Multistep Thermochemical Cycles	176
5.6	Hybrid Thermochemical Cycles	197
5.6.1	Hybrid Electro-ThermoChemical Cycles	200
5.6.2	Thermo-Photo-ElectroChemical Water-Splitting Cycles	212
5.6.3	Thermo-RadioChemical Water Splitting	219
5.7	Down Selection of Thermochemical Cycles for Nuclear Hydrogen Production	220
5.8	Comparative Assessment of Thermochemical Cycles	229
5.9	Flow-Sheet Assessment of Thermochemical Plants: Mark 10 Case Study	237

5.10	Development Aspects of Thermochemical Plants	242
5.10.1	Sulfur–Iodine Thermochemical Plant	242
5.10.2	Hybrid Sulfur Thermochemical Plant	253
5.10.3	Hybrid Copper–Chlorine Plant	259
5.11	Conclusions	267
	References	270
6	Hybrid Copper–Chlorine Cycle	273
6.1	Introduction	274
6.2	Copper–Chlorine Cycle Versions	278
6.3	Physicochemical Properties of Copper and Chlorine Compounds in Cu–Cl Cycles	292
6.4	Electrochemical Step in the Hybrid Copper–Chlorine Cycles . . .	304
6.4.1	Classification of Electrochemical Cells	304
6.4.2	Electrode Development for Anodic and Cathodic Reactions	308
6.4.3	Membrane Development	314
6.4.4	Copper-Chloride Complexation Studies	316
6.4.5	Full-Cell Experiments	318
6.4.6	Electrochemical Cell Modeling	322
6.5	Hydrolysis Reaction Step	329
6.5.1	Thermodynamics of Hydrolysis Reaction	329
6.5.2	Overview of Experimental Reactor Developments	334
6.5.3	Benchtop Experiments and Results	338
6.5.4	Spray-Type Mini-Reactor for Hydrolysis (ANL)	339
6.5.5	Scaled-Up Hydrolysis Reactor and Test Loop (UOIT) . . .	341
6.5.6	Hydrolysis Process Modeling and Simulations	346
6.6	Thermolysis Reaction Step	355
6.6.1	Reaction Kinetics Thermodynamics	355
6.6.2	Scaled-Up Thermolysis Reactor (UOIT)	358
6.7	Dehydration Step of Cupric Chloride	364
6.7.1	Spray Drying Experiments (UOIT)	364
6.7.2	Crystallization Experiments (UOIT)	373
6.7.3	Modeling of Spray Drying Process	374
6.8	Thermochemical Chlorination Step of Copper Particles	377
6.8.1	Reaction Kinetics and Thermodynamics	377
6.8.2	Hydrodynamic Cold Tests with a Scaled-Up Packed Bed Reactor (UOIT)	379
6.8.3	Modeling of Chlorination Reactor	383
6.9	Heat Recovery and Reuse Within a Cu–Cl Plant	389
6.9.1	Pinch Analysis	389
6.9.2	Heat Recovery from Molten CuCl	393
6.9.3	Heat Pump Integration in a Copper–Chlorine Plant	402
6.10	Material Selection and Research	410
6.11	Scaled-Up Test Loop at UOIT	412

6.12	Conceptual Designs of Full-Size Plant and Reactors	414
6.13	ASPEN Plus Plant Simulation and Flow Sheets	422
6.14	Plant Control, Safety, and Reliability	424
6.15	Cost, Exergo-Economic, and Life Cycle Assessments	426
6.16	Conclusions	430
