1	Introduction	1
1.1	Wavelet Transform	1
1.2	Multiresolution Representations and Wavelets	3
1.2.1	Continuous-Time Wavelets	5
1.2.2	Discretization of Time-Scale Parameter	6
1.2.3	Discrete Wavelet Transform	7
1.2.4	Wavelet Reconstruction	10
1.2.5	Multistep Decomposition and Reconstruction	11
1.2.6	Two-Dimensional DWT	11
1.3	Review of DWT Implementation Issues and Applications	13
1.3.1	Digital Filter Bank and Finite Word-Length Effects	15
1.3.2	Discrete Wavelet Transform and Signal Denoising	16
1.3.3	Fast Computation of Discrete Wavelet Transform	19
1.3.4	Discrete Wavelet Transform Applied to Power Quality Signal Classification	19
1.4	Major Contributions of the Book	20
2	Filter Banks and DWT	21
2.1	Introduction	22
2.2	Orthogonal Filter Banks	22
2.2.1	Two-Channel Quadrature Mirror Filter Bank	23
2.2.2	Computational Complexity of Discrete Wavelet Transform	27
2.3	Parallel Filter Bank Realization of Multilevel Discrete Wavelet Transform	27
2.3.1	Iterated Filters and Regularity	28
2.3.2	One Set of Forward Discrete Wavelet Transform Computation	30
2.4	Frequency Response of Generated Parallel Filter Bank	34
2.5	Conclusions	36

3	Finite Precision Error Modeling and Analysis	37
3.1	Introduction	38
3.2	Computational Complexity of DWT	39
3.2.1	The DWT Data: Word Requirements	40
3.3	Finite Precision Filter Bank Implementation	40
3.3.1	Coefficient Quantization in FIR Filters	41
3.3.2	Round-off Noise Model	42
3.3.3	Quantized Coefficient Modeling of Perfect Reconstruction Filter Bank	44
3.4	Finite Precision DWT Modeling	45
4	PVM Implementation of DWT-Based Image Denoising	51
4.1	Introduction	52
4.2	Multicomputer Network	53
4.2.1	Parallel Algorithm	53
4.2.2	Timing Consideration	55
4.3	Speedup Using PVM	56
4.3.1	Workload Allocation	58
4.3.2	Speedup Factor	58
4.3.3	Efficiency	59
5	DWT-Based Power Quality Classification	61
5.1	Introduction	61
5.2	DWT in Feature Detection and Extraction	62
5.2.1	Detection and Localization of PQ Disturbances	63
5.2.2	Expert System in PQ Classification	64
5.3	Results and Discussion	76
5.3.1	Application of Fuzzy Expert System in PQ Classification	76
5.4	Conclusions	81
6	Conclusions and Future Directions	83
6.1	Concluding Remarks	83
