

Contents

1	Emotion and Satisficing Engineering	1
	Shuichi Fukuda	
2	Emotion and Innovation	11
	Shuichi Fukuda	
3	Touch Feelings and Sensor for Measuring the Touch Feeling	23
	Mami Tanaka	
4	Eliciting, Measuring and Predicting Affect via Physiological Measures for Emotional Design	41
	Feng Zhou and Roger Jianxin Jiao	
5	Sensory Stimulation of Designers	63
	Céline Mougenot and Katsumi Watanabe	
6	FuzEmotion: A Backward Kansei Engineering Based Tool for Assessing and Confirming Gender Inclination of Modern Cellular Phones	73
	Hsiang-Hung Hsiao, William Wei-Lin Wang and Xun W. Xu	
7	ProEmotion: A Tool to Tell Mobile Phone's Gender	95
	William Wei-Lin Wang, Hsiang-Hung Hsiao and Xun W. Xu	
8	Kansei Engineering: Methodology to the Project Oriented for the Customers	107
	Viviane Gaspar Ribas EL Marghani, Felipe Claus da Silva, Liriane Knapik and Marcos Augusto Verri	
9	Kansei Engineering: Types of this Methodology	127
	Viviane Gaspar Ribas EL Marghani, Felipe Claus da Silva, Liriane Knapik and Marcos Augusto Verri	

10	Interaction Between Emotions and Mental Models in Engineering and Design Activities	149
	Robert J. de Boer and Petra Badke-Schaub	
11	Emotional Quality Inspection for Revealing Product Quality	165
	Teruaki Ito	
12	Design Impression Analysis Based on Positioning Coloring of Design Elements	181
	Hideki Aoyama and Naoki Okamura	
13	Robust Design on Emotion for PET Bottle Shape Using Taguchi Method	195
	Khusnun Widiyati and Hideki Aoyama	
14	Multisensory User Experience Design of Consumer Products	219
	Monica Bordegoni, Umberto Cugini and Francesco Ferrise
