

Contents

1	Introduction	1
1.1	Motivation	1
1.2	Motion Planning Literature	1
1.3	Passivity-Based Control Overview	5
1.4	Passivity-Based Model Predictive Control	6
1.5	Scope of the Work	7
	References	8
2	PB/MPC Navigation Planner	11
2.1	Introduction	11
2.2	PB/MPC Optimization Framework	12
2.2.1	Cost Function	13
2.2.2	Optimization Constraints	15
2.2.3	Optimization Techniques	16
2.3	Design of the PB/MPC Motion Planner	17
2.3.1	General Model	17
2.3.2	Energy-Shaping Using a Navigation Function	18
2.3.3	Energy Storage Function	20
2.3.4	Passivity	21
2.3.5	Zero State Observability	21
2.3.6	Stability	22
	References	23
3	Examples	25
3.1	Introduction	25
3.2	Flat Terrain	25
3.2.1	Unicycle Vehicle	25
3.2.2	Car-Like Mobile Vehicle with Slippage	26
3.2.3	Simulations	28
3.3	Rough Terrains	30
3.3.1	General Model of a Vehicle in Rough Terrain	31
3.3.2	Energy-Shaping Using a Navigation Function	34

3.3.3	Passivity-Based Stability	35
3.3.4	Simulation	37
	References	39
4	Some Limitations and Real-Time Implementation	41
4.1	Introduction	41
4.2	The Worst Case Scenarios on Rough Terrains.	41
4.2.1	Unknown Rough Terrain with Obstacles	41
4.2.2	Completely Known Rough Terrain with Obstacles	43
4.2.3	Unknown Rough Terrain Without Obstacles.	45
4.3	Real Time Implementation of an MPC Based Motion Planner	47
4.3.1	Simulation Results	48
	References	51
5	Conclusion.	53
	Editors' Biography	55

Passivity-Based Model Predictive Control for Mobile
Vehicle Motion Planning

Tahirovic, A.; Magnani, G.

2013, XI, 56 p. 20 illus., 17 illus. in color., Softcover

ISBN: 978-1-4471-5048-0
