

Contents

1	Introduction	1
1.1	Overview on Coordination Approaches	2
1.2	Attitude Synchronization of Rigid-Body Systems	3
1.3	Formation Control of VTOL UAVs	6
1.4	Handling Communication Delays	8
1.5	Book Outline	9
2	Background and Preliminaries	11
2.1	Preliminaries	11
2.1.1	Notation and Definitions	11
2.1.2	Useful Lemmas	12
2.1.3	Bounded Functions	13
2.1.4	Information Flow Modeling	14
2.2	Attitude Representation and Kinematics	16
2.2.1	Attitude Representation	17
2.2.2	Attitude Kinematics	21
2.3	Dynamical Model of VTOL UAVs	22
2.3.1	Example of Quadrotor Aircraft	22
2.3.2	Example of Ducted-Fan Aircraft	24
2.3.3	Nominal Model for VTOL UAVs	25
3	Rigid-Body Attitude Synchronization	27
3.1	The Attitude Synchronization Problem	27
3.2	Preliminaries	28
3.2.1	Relative Attitude Error	28
3.2.2	Attitude Tracking Error	30
3.3	State Feedback Attitude Synchronization	31
3.4	Velocity-Free Attitude Synchronization—First Approach	33
3.4.1	Leaderless and Leader-Follower Attitude Synchronization	34
3.4.2	Leaderless Attitude Synchronization with Zero Final Velocity	39

3.4.3	Cooperative Attitude Tracking	41
3.5	Velocity-Free Attitude Synchronization—Second Approach	42
3.5.1	Leaderless and Leader-Follower Attitude Synchronization .	43
3.5.2	Cooperative Attitude Tracking	46
3.6	Simulation Results	47
3.7	Discussion and Concluding Remarks	57
4	Rigid-Body Attitude Synchronization with Communication Delays .	63
4.1	State Feedback Attitude Synchronization	64
4.1.1	Leaderless and Leader-Follower Attitude Synchronization .	64
4.1.2	Cooperative Attitude Tracking	68
4.2	Attitude Synchronization Without Angular Velocity Measurements	69
4.2.1	Case of Undirected Networks and Time-Varying Communication Delays	71
4.2.2	Case of Directed Networks and Constant Communication Delays	76
4.3	Simulation Results	79
4.4	Discussion and Concluding Remarks	80
5	Position Tracking for VTOL UAVs	85
5.1	Position Control Design Method	86
5.1.1	Thrust and Desired Attitude Extraction	86
5.1.2	Control Design Procedure	88
5.2	Position Tracking Control of VTOL UAVs	89
5.2.1	Design in the Full State Information Case	90
5.2.2	Design Without Linear-Velocity Measurements	95
5.3	Simulation Results	101
5.4	Concluding Remarks	101
6	Formation Control of VTOL UAVs	105
6.1	Formation Control in the Full State Information Case	106
6.2	Formation Control Without Linear-Velocity Measurements	112
6.3	Redesign with Reduced Information Flow	118
6.4	Simulation Results	122
6.5	Concluding Remarks	124
7	Formation Control with Communication Delays	129
7.1	Formation Control in the Full State Information Case	129
7.1.1	Delay-Dependent Formation Control Scheme	131
7.1.2	Delay-Independent Formation Control Scheme	137
7.2	Formation Control Without Linear-Velocity Measurements	140
7.2.1	Delay-Dependent Formation Control Scheme	140
7.2.2	Delay-Independent Formation Control Scheme	143
7.3	Simulation Results	146
7.4	Concluding Remarks	149

8 Conclusions 153

8.1 Rigid-Body Attitude Synchronization 153

8.2 Formation Control of VTOL UAVs 154

8.3 Open Problems 154

Appendix Proofs 157

A.1 Proof of Lemma 2.9 157

A.2 Proof of Lemma 3.1 158

A.3 Proof of Lemma 3.2 160

A.4 Proof of Theorem 3.3 161

A.5 Proof of Theorem 3.5 163

A.6 Proof of Theorem 3.6 165

A.7 Proof of Lemma 4.1 167

A.8 Proof of Theorem 4.2 168

A.9 Proof of Theorem 4.6 169

A.10 Proof of Lemma 7.1 170
